Damming The Three Gorges What Dam Builders Dont Want To Know:

Damming the Three Gorges Gráinne Ryder, Margaret Barber, 1993 **Damming the Three Gorges** Margaret Barber, Gráinne Ryder, 1993 Recently the Chinese government has decided with a minimum of fanfare to press ahead with one of the largest hydroelectric project ever built a dam across the Yangtze river at the Three Gorges The dam aims to generate 17 500 MW of electricity will displace over 1 million people and will create a lake over 450 miles long **The Three Gorges Dam's Impact on Peasant Livelihood** Jan Trouw, 2014-04-23 Due to the Three Gorges Dam China's Yangtze becomes a 600 kilometers long reservoir that submerges everything below Therefore more than 1 3 million people lose their houses their arable land as well as their personal belongings The book in hand examines the socio economic impact on peasant livelihood before during and after the state forced resettlement **Damming the Three Gorges** Margaret Barber, Grainne Ryder, 1993 **Dams and Development** Sanjeev Khagram, 2018-08-06 Big dams built for irrigation power water supply and other purposes were among the most potent symbols of economic development for much of the twentieth century Of late they have become a lightning rod for challenges to this vision of development as something planned by elites with scant regard for environmental and social consequences especially for the populations that are displaced as their homelands are flooded In this book Sanjeev Khagram traces changes in our ideas of what constitutes appropriate development through the shifting transnational dynamics of big dam construction Khagram tells the story of a growing but contentious world society that features novel and increasingly efficacious norms of appropriate behavior in such areas as human rights and environmental protection The transnational coalitions and networks led by nongovernmental groups that espouse such norms may seem weak in comparison with states corporations and such international agencies as the World Bank Yet they became progressively more effective at altering the policies and practices of these historically more powerful actors and organizations from the 1970s on Khagram develops these claims in a detailed ethnographic account of the transnational struggles around the Narmada River Valley Dam Projects in central India a huge complex of thirty large and more than three thousand small dams He offers further substantiation through a comparative historical analysis of the political economy of big dam projects in India Brazil South Africa and China as well as by examining the changing behavior of international agencies and global companies The author concludes with a discussion of the World Commission on Dams an innovative attempt in the late 1990s to generate new norms among conflicting stakeholders ***China's Challenges to Human Security*** Guoguang Wu, 2012-11-27 This book looks at human security in China's foreign relations It discusses the concept and theory of human security and their implications for China The book goes on to analyse environmental security issues including climate change and water resources as well as looking at issues from an energy consumption perspective Significant human security issues are then focussed on including food safety pandemic disease control migration and the human rights implications of China's overseas investment **Dams as Aid** Ann Danaiya Usher, 2005-08-18 Dams As Aid

brings together key issues in the aid environment development debate Through her examination of dams Usher sheds light on wider issues of the political economy of aid Detailed analysis of dams and aid case studies are included particularly on Nordic dams which provide most graphic illustrations and these detailed case studies are located within a broad comparative and theoretical perspective

Case Concerning the Gabčíkovo-Nagymaros Project (Hungary/Slovakia): part 2.

Annexes, scientific reports and studies, 1994 **Capacity Building for Environmental Law in the Asian and Pacific Region** Donna G. Craig, Nicholas A. Robinson, Kheng Lian Koh, 2003 National sectoral and international approaches to environmental law education are integrated in this comprehensive resource on environmental law in Asian and Pacific countries A broader definition of sustainable development that incorporates social cultural and economic dimensions facilitates consideration of social justice and equity in environmental law Specific environments including freshwater ecosystems forests and intercoastal zones are discussed in this volume including information on biological diversity climate change and sustainable development

Mega-Dams in World Literature Margaret Ziolkowski, 2024-04-15 Mega Dams in World Literature reveals the varied effects of large dams on people and their environments as expressed in literary works focusing on the shifting attitudes toward large dams that emerged over the course of the twentieth century Margaret Ziolkowski covers the enthusiasm for large dam construction that took place during the mid twentieth century heyday of mega dams the increasing number of people displaced by dams the troubling environmental effects they incur and the types of destruction and protest to which they may be subject Using North American Native American Russian Egyptian Indian and Chinese novels and poems Ziolkowski explores the supposed progress that these structures bring The book asks how the human urge to exploit and control waterways has affected our relationships to nature and the environment and argues that the high modernism of the twentieth century along with its preoccupation with development casts the hydroelectric dam as a central symbol of domination over nature and the power of the nation state Beyond examining the exultation of large dams as symbols of progress Mega Dams in World Literature takes a broad international and cultural approach that humanizes and personalizes the major issues associated with large dams through nuanced analyses paying particular attention to issues engendered by high modernism and settler colonialism Both general and specialist readers interested in human environment relationships will enjoy this prescient book

Mastering the Machine Revisited Ian Smillie, 2000 Mastering the Machine Revisited is about the connection between poverty aid and technology It is about the search driven today by greater extreme poverty than has ever been known and by a realization that the technologies applied to the problem have severe limitations
