Damnation And Deviance The Protestant Ethic And The Spirit Of Failure:

Damnation and Deviance Mordechai Rotenberg, 2018-10-08 The Calvinist view that man is predestined to be among the elect or the damned has profoundly influenced not only our views of criminals and deviants but also the theoretical basis of correctional methods and psychotherapeutic techniques In this provocative and original volume Mordechai Rotenberg examines the impact of Protestant doctrine on Western theories of deviance He explores the inherent contradiction between Protestant ethics with its view of human nature as predestinated and the people changing sciences Rotenberg presents empirical studies that show how people s tendency to label themselves and others as deviant can be predicted on the basis of their exposure to Western socialization He contrasts alienating individuals the result of competitiveness and exaggerated independence fostered by socialization in Protestant societies to the reciprocal individualism of Hassidic Japanese and other non Western cultures Examining the Protestant bias of Western behavioral sciences Rotenberg examines modern theories of deviance and proposes alternative models He compares traditional past oriented insight therapy grounded in Calvinist methods of introspection self torment and conversion with Hassidic notions of redemption and salvation Rotenberg provides important historical and sociological insights into the intellectual origins of modern theories of deviance His argument that Western behavioral science retains a Calvinist view of humanity will force most scholars to examine anew the assumptions and foundations of their own theories Gerald N Grob Rutgers University A highly original work which should be of great interest to anyone concerned with relevant behavior It shows how macro definitions in a society tend to lead people to think about themselves and their ills in certain ways and thus to deviate in certain ways Richard A Cloward co author *Regulating the Poor The Functions of Public Welfare* Deviance and Medicalization Peter Conrad, 2010-04-20 A classic text on deviance is updated and reissued *Deviant Behaviour* Clifton D. Bryant, 2014-09-03 A comprehensive set of readings examining the full range of concerns in the field of deviant behaviour All the selections are relatively recent and have not appeared in other anthologies **Sexualities: Some elements for an account of the social organisation of sexualities** Kenneth Plummer, 2002 Volume 3 *Difference and Diversity of Sexualities* This section examines the politics power and critique of sexual categories including bisexuality sex addiction prostitution and sadomasochism **Dialogue with Deviance** Mordechai Rotenberg, 1993 Mordechai Rotenberg who is well known for his work on the pessimistic impact of Protestant ethics on the Western social sciences presents here a systematic study derived from and based on Judeo Hasidic ethics Proceeding from the cabalistic Hasidic concept of contraction tzimtsum according to which God s voluntary withdrawal into Himself to evacuate space for the world serves as a model for human behavior Professor Rotenberg shows that it is not personal social construction but self and social contraction that explains how the is and the ought of society are developed and maintained Re-Biographing and Deviance Mordecha Rotenberg, 1987 *Re Biographing and Deviance* examines the Jewish Midrashic model for self renewal through time In this important new study author Rotenberg questions

how traditional Judaism with its contradictory notions of teshuvah repentance and of remembrance of the past allows for the contemporary Jew to maintain a healthy cognitive dialogue between past failures and future aspirations The author illustrates how the Midrashic narrative philosophy entails a psychotherapeutic system for reinterpretation of past sins into positive future oriented biographies which in turn provide fuel for Jewish vitality and its continuity between past present and future

The Trance of Terror Mordechai Rotenberg,2006 How do western life oriented democracies understand the threatening suicide bombing phenomenon which Islamic culture nurtures in recent years The Trance of Terror is the first study that scrutinizes the psychological mechanisms that social systems use to create the robotic person who acts in an automatic fashion in the name of one single truth The psychological technique which Rotenberg terms hypnotic mantrism may be identified in various social processes such as praying singing and dancing But it is the ecstatic dimension claims Rotenberg that religious despots often use to inculcate fanatic behavior which may even include suicide bombing Mordechai Rotenberg is a Professor at the Hebrew University of Jerusalem where he taught psychology and religion Among his other books are Seventy faces of Life PaRDeS and Psychonarration and The Yetzer His book Existence in the Secret of Tzimtzum won the Jerusalem Award for Jewish Philosophy

History, Historians, and the Dynamics of Change William A. Green,1993-02-22 Green offers a remarkably lucid erudite and insightful description and analysis of the theoretical foundations of modern historical writing He is the first to provide an orderly introduction to the several systematic models by which leading modern historians have attempted to explain continuity and change This cogent survey is essential to an understanding of modern Western historiography The book introduces history as a theoretical discipline Green examines the many pitfalls of historical writing and demonstrates that historical truth is a most elusive quarry He addresses periodization the manner in which past time is divided showing how prevailing modes of periodization have evolved in the West Part two of the book is concerned with the dynamics of change in European history Each chapter considers a specific theoretical orientation including the commercial model initiated by Adam Smith and pursued by Henri Pirenne and others the demographic model first formulated by Malthus the Marxian model or models and the approaches of Weber and Sombart who identified religious forces as the chief engines of historical change Part three addresses models of change being employed in world history particularly the world system approach of Frank and Wallerstein and the creative orientations of environmental historians In his conclusion Green returns to the question of whether the theoretical models of change currently in use among historians are consistent with contemporary modes of periodization The bibliography is extensive
