Music and Trance Gilbert Rouget, 1985-12-15 Ritual trance has always been closely associated with music but why and how Gilbert Rouget offers an extended analysis of music and trance concluding that no universal law can explain the relations between music and trance they vary greatly and depend on the system of meaning of their cultural context Rouget rigorously examines a worldwide corpus of data from ethnographic literature but he also draws on the Bible his own fieldwork in West Africa and the writings of Plato Ghazzali and Rousseau To organize this immense store of information he develops a typology of trance based on symbolism and external manifestations He outlines the fundamental distinctions between trance and ecstasy shamanism and spirit possession and communal and emotional trance Music is analyzed in terms of performers practices instruments and associations with dance Each kind of trance draws strength from music in different ways at different points in a ritual Rouget concludes In possession trance music induces the adept to identify himself with his deity and allows him to express this identification through dance Forcefully rejecting pseudo science and reductionism Rouget demystifies the so called theory of the neurophysiological effects of drumming on trance He concludes that music's physiological and emotional effects are inseparable from patterns of collective representations and behavior and that music and trance are linked in as many ways as there are cultural structures

Encyclopedia of Diasporas Melvin Ember, Carol R. Ember, Ian Skoggard, 2004-11-30 Immigration is a topic that is as important among anthropologists as it is the general public Almost every culture has experienced adaptation and assimilation when immigrating to a new country and culture usually leaving for what is perceived as a better life Not only does this diaspora change the country of adoption but also the country of origin Many large nations in the world have absorbed and continue to absorb large numbers of immigrants The foreseeable future will see a continuation of large scale immigration as many countries experience civil war and secessionist pressures Currently there is no reference work that describes the impact upon the immigrants and the immigrant societies relevant to the world's cultures and provides an overview of important topics in the world's diasporas The encyclopedia consists of two volumes covering three main sections

Diaspora Overviews covers over 20 ethnic groups that have experienced voluntary or forced immigration. These essays discuss the history behind the social, economic and political reasons for leaving the original countries and the cultures in the new places. Topics discuss the impact and assimilation that the immigrant cultures experience in their adopted cultures, including the arts they bring, the struggles they face, and some of the cities that are in the forefront of receiving immigrant cultures. Diaspora Communities include over 60 portraits of specific diaspora communities. Each portrait follows a standard outline to facilitate comparisons. The Encyclopedia of Diasporas can be used both to gain a general understanding of immigration and immigrants and to find out about particular cultures, topics and communities. It will prove of great value to researchers and students, curriculum developers, teachers and government officials. It brings together the disciplines of anthropology, social studies, political studies, international studies and immigrant and immigration studies. Handbook to Life in Medieval and Early Modern Japan William E. Deal, 2005. Captures the essence of life in great civilizations of the past. Each volume in this series examines a single civilization and covers everything from landmark events and monumental achievements to geography and everyday life. **Rhythms of the Afro-Atlantic World** Ifeoma C.K. Nwankwo, Mamadou Diouf, 2019-02-28. Collected essays exploring the origins and evolution of music and dance in Afro-Atlantic culture. Kiowa Voices: Ceremonial dance, ritual, and song Maurice Boyd, 1981. In this first volume of Kiowa Voices the society has presented Kiowa cultural beliefs and values as preserved and revealed in a combination of Kiowa ceremonial dances and song rituals, their legends and art. *Dancing Spirits* Gerdes Fleurant, 1996-10-21. The reflexive approach and the concept of bimusicality have made possible this in-depth study of the Rada rite, the foundation of the complex and sensationalized religion of Haiti Vodun. Fleurant returned to his native Haiti to immerse himself in the socio-cultural life of those who practice the religion that was brought to Haiti by the people captured in Africa from the 16th to the 18th centuries. Through total immersion in daily life, culture and apprenticeship in the music culture, reflexive approach and concept of bimusicality, the author has accessed information and provided a descriptive analysis heretofore unavailable to scholars. From this privileged position, the author details the complexity, sophistication and beauty of the ritual music and dance. The pioneering works on the music or the dance of Vodun have attempted to cover the whole ritual spectrum. Fleurant contends that the religion is too complex and too sensationalized to be treated in one volume and that each rite should be studied separately and in greater depth. *Dancing Spirits* examines drum rhythms, song tunes and texts of the major Rada dances. A model of the Rada ceremony in Bpo, a community located some ten miles north of Port au Prince, serves as a guide to the reader not familiar with Vodun liturgy. The work challenges studies that do not delve deeply enough into this complex religion and serves as a model for further studies. Dancing Lady Lilly Grove Frazer, 1895. DANCING MRS.
