 Human attitudes toward animals have followed an interesting progression since the conservation movement began in the mid
 19th century This book traces the changing patterns of human perceptions of wild animals through a study of the literature
 of the late 19th and 20th centuries Photographs as well as literary references from such authors as Jack London John Muir
 and Rachel Carson are used to illustrate people s attitudes toward wildlife The author does not argue either for or against the
 animal rights movement She advocates acceptance of animals as they are and tries to combat the human centeredness that
 has pervaded our thinking about the animal kingdom This well written volume would be an interesting addition to
