Dangerous Intersections Feminist Perspectives On Population Environment And Development:

Dangerous Intersections Jael Miriam Silliman, Ynestra King, 1999 This anthology offers a multicultural international look at the issues of environment development and population control Feminist scholars and activists reveal the racism behind the scapegoating of women the poor and immigrants as the source of major world problems and present realistic solutions that rely on the ingenuity and resourcefulness of women

Mainstreaming Gender in Environmental Assessment and Early Warning, 2005

Environmental Security and Gender Nicole Detraz, 2014-08-21 Over the past 20 years scholars policymakers and the media have increasingly recognized the links between both traditional and non traditional security issues and the changing condition of the global environment Concepts such as environmental security and resource conflict have been used to hint at these significant linkages While there has been a good deal of scholarly work conducted that seeks to identify the ways that actors link these concepts there has been little examination of the intersection between approaches to environmental security and gender This book explores this intersection to provide an insight into the gendered nature of both global environmental politics and security studies It examines how the issues of security and the environment are linked to theory and practice and the extent to which gender informs these discussions By adopting a feminist environmental security discourse this book provides crucial redefinitions of key concepts and offers new insights into the ways we understand security environment connections Case studies evaluate if and how environment and security discourses are being used to understand a range of environmental issues and how a feminist environmental security discourse contributes to our understanding of security environment connections This multidisciplinary volume draws on literature from the environmental sciences security studies and sociology to highlight the complex human insecurities that often accompany environmental change As conceptualizations of security continue to shift and broaden to include environmental issues and concerns it is imperative that gender informs the debate

Mainstreaming Gender in Environmental Assessment and Early Warning Joni Seager, *Environmental Change and Security Project Report*, 1999

Gender and the Environment Nicole Detraz, 2016-12-20 Climate change natural disasters and loss of biodiversity are all considered major environmental concerns for the international community both now and into the future Each are damaging to the earth but they also negatively impact human lives especially those of women Despite these important links to date very little consideration has been given to the role of gender in global environmental politics and policy making This timely and insightful book explains why gender matters to the environment In it Nicole Detraz examines contemporary debates around population consumption and security to show how gender can help us to better understand environmental issues and to develop policies to tackle them effectively and justly Our society often has different expectations of men and women and these expectations influence the realm of environmental politics Drawing on examples of various environmental concerns from countries around the world *Gender and the Environment* makes the case that it is only by adopting a more inclusive

focus that embraces the complex ways men and women interact with ecosystems that we can move towards enhanced sustainability and greater environmental justice on a global scale This much needed book is an invaluable guide for those interested in environmental politics and gender studies and sets the agenda for future scholarship and advocacy

Dangerous Intersections Jael Miriam Silliman, Ynestra King, 1999 This collection of original critical essays by well known feminist scholars and activists presents a multicultural international scope on the major global issues of the day environment development and population control The authors pointed analyses reveal the racism behind environmental degradation and immigration control the paternalism underlying many population control efforts and the widespread scapegoating of women the poor and immigrants as the source of major world problems *Dangerous Intersections* presents realistic solutions that rely on the ingenuity and resourcefulness of local communities of women as the agents of global change Essays cover topics such as the use and mis use of reproductive technology the real impact of population growth on the environment the devastating effects of militarism and consumption and movements for sovereignty and social justice worldwide *Dangerous Intersections* will force readers to confront the intertwined effects of our attitudes toward population the environment and development This call for just equitable solutions to urgent problems will enlighten activists scholars and policy makers alike

Caring for Them from Birth to Death Christina Perez, 2008-01-01 Through qualitative interviews and participant observation with Cuban primary care neighborhood doctors and nurses this book brings the reader into everyday life in Havana The first book to examine Cuba's health care system and the health of the Cuban population since the Special Period it explains how Cuba manages to improve its health indices year after year_ an extraordinary achievement considering the economic inequalities that exist in Cuba today

Global Prescriptions Rosalind P. Petchesky, 2003-08 *Global Prescriptions* is a critical yet optimistic analysis of the role of transnational women's groups in setting the agendas for women's health in international and national settings The book reviews a decade of women's participation in UN conferences transnational networks national advocacy efforts and sexual and reproductive health provision assessing both their strengths and weaknesses It critiques the Cairo Beijing and Copenhagen conference documents and World Bank WHO and health sector reform policies It also offers case studies of national level reform and advocacy efforts and appraises the controversy concerning TRIPS trade and essential AIDS drugs The author takes into account the formidable political and ideological forces confronting global justice movements and also offers a sobering reassessment of transnational women's NGOs themselves and such problems as NGOization fragmentation and donor dependency Petchesky argues that the power of women's transnational coalitions is only as great as their organic connection with grassroots social movements
