Sustaining Export-Oriented Development Ross Garnaut,Enzo Grilli,James

Riedel,1995-09-29 This book first published in 1995 looks at the East Asian economies post war development and assesses the possibilities of transferring East Asian development elsewhere Written and edited by economists Sustaining Export Oriented Development traces the changes in the thinking of policy makers and advisers about the policies required for economic development especially the changed emphasis from import substitution to outward orientation which coincided with the East Asian economies success Several contributors focus on identifying the key factors in the growth of these dynamic economies Others look at future constraints such as the environmental limits to growth and the sustainability of export growth in China This book makes a significant contribution to the discussion of economic growth and development issues and will be of interest to those in economics trade and aid and others concerned with public policy *FDI,*

Regionalism, Government Policy and Endogenous Growth Anthony Bende-Nabende,2018-08-20 Published in 1999 this text investigates whether FDI caused spill over effects which have led to the economic growth of the ASEAN 5 economies and if that it so whether the ASEAN Preferential Trade Agreement APTA had a significant effect in attracting FDI to the region It takes into account the different levels of economic development of the countries under analysis The results from the structural static model suggest that FDI has stimulated economic growth through the human factors followed by technology transfer international trade and learning by doing and that the formation of APTA had a lagged influence on FDI inflows into the advantage of the more developed member countries and the disadvantage of the less developed countries Those from the multiplier dynamic effects analysis demonstrate that whereas the impact is immediate in the more developed politically stable and foreign investment friendly economies there is a time lag in those economies which are less developed and more hostile to FDI The analysis presents an empirical comparison of how the level of economic development affects the interaction of FDI regionalism and economic growth Can Developing Countries Benefit from Strategic Export Promotion?

Xiangkang Yin,1997

Import Controls And Export-oriented Development Richard Luedde-neurath,2019-04-02 This book

aims to consider the role of import controls in an export oriented development strategy and is based on a case study of South Korea widely regarded as one of the classic success stories in this respect According to accepted wisdom a strategy of export orientation should be predicated upon a liberal import regime Trade controls should be avoided as they give rise to a host of negative consequences The South Korean experience is often held up as an empirical illustration of how liberal import polices constitute an integral part of export oriented success Annual Report - Research School of Pacific Studies
