Danish Design:

Danish Design Heritage and Global Sustainability Ditte Lysgaard Vind, 2023-10-23 With a bias for action this book offers valuable insights into the origins of the much celebrated Danish design tradition and how it can be employed to create design solutions to address today's environmental crisis using the planetary boundaries as positive creative constraints Danish design has long been revered for its high quality aesthetics materials and craftsmanship encouraging sustainability without compromise This book explores the lessons to be learnt from Scandinavian design ideals introduces the philosophy and principles of circular economy and showcases the potential power of combining circular economy and design in helping to mitigate the effects of climate change It presents a range of case study examples across multiple sectors and includes interviews with Danish designers from architecture furniture fashion digital and industrial design providing unique insights by some of the world's leading contemporary designers Bridging theory and real world insights and experiences this book builds on the framework of the 4Rs The Circular Way Reduce Reuse Recycle and Replace to encourage innovation through the replacement of environmentally damaging materials and business models A must read for product designers industrial designers consultants business developers sustainability professionals and students interested in learning how to design and implement circular sustainable models into practice Designing Worlds Kjetil Fallan, Grace Lees-Maffei, 2016-06 From consumer products to architecture to advertising to digital technology design is an undeniably global phenomenon Yet despite their professed transnational perspective historical studies of design have all too often succumbed to a bias toward Western industrialized nations This diverse but rigorously curated collection recalibrates our understanding of design history reassessing regional and national cultures while situating them within an international context Here contributors from five continents offer nuanced studies that range from South Africa to the Czech Republic all the while sensitive to the complexities of local variation and the role of nation states in identity construction *Danish Building Design*, 1984
