How Do You Ai Blog Writer Guide For Teachers:

The Hitchhiker's Guide to AI Arthur Goldstuck, 2025-08-01 Arthur Goldstuck is a veteran of understanding how new technologies interact with all parts of society This book provides an informative and accessible look at what AI might have in store for us DR BENJAMIN ROSMAN Professor of AI and Robotics University of the Witwatersrand The Hitchhiker's Guide to AI is a thoughtful book that takes a close look at one of the most significant developments of the year with specific reference to Africa and developing economies It is food for thought written with a light touch while raising many of the most salient questions SANDRA LAURENCE TechCentral The Hitchhiker's Guide to AI is one of the most interesting and easy to follow books of its kind CHRIS GIBBONS Acumen Explore the ever evolving world of AI with ease discovering its practical applications and the magic it's creating REHANA RUTTI Womans World Did you know that AI helped South Africa to win the 2023 Rugby World Cup That Africa led the way in small language models That AI has been supporting farmers in Kenya for the last decade The Hitchhiker's Guide to AI The African Edge reframes the conversation about AI through the lens of human roles and merges global advances with distinctly African realities From farmers using AI to track bee movements to school pupils guided by WhatsApp tutors to musicians experimenting with machine made beats this book explores how everyday people across the African continent are shaping and being shaped by the rise of machine intelligence Rather than obsessing over distant futures or Silicon Valley breakthroughs this book brings AI down to earth Through the eyes of local and international teachers coders executives and artists it tells the story of Africa's AI moment not as a catch up game but as reframing the global narrative Insightful grounded and provocative it's a guide to navigating the most transformative technology of our age with feet firmly planted on African soil and eyes wide open to the global context [The Radical Case for Teaching Skim Reading in First-Year Writing](#) Ellen C. Carillo, 2025-10-15 The Radical Case for Teaching Skim Reading in First Year Writing encourages faculty particularly in writing studies to check internal biases toward deep reading and teach skim reading in first year writing courses Written by Ellen C Carillo who has previously published on the importance of teaching deep reading this small book is a controversial prompt for further discussion and exploration Data from studies of the lived experiences of undergraduates indicate that students do not need deep reading practices in the majority of their classes across the disciplines and moreover that students succeed in their classes by skim reading Rather than imagining an idealized set of circumstances that allow for sustained deep reading as does a great deal of the scholarship on reading in writing studies The Radical Case for Teaching Skim Reading in First Year Writing argues for teaching students reading practices that will support their success in their college writing assignments rather than those strategies the field believes should support their success In our information landscape and our fragile democracy encouraging skimming as opposed to deep reading may seem like a gamble this very tendency toward the quick rather than the critical has undoubtedly contributed to the current crisis of mass misinformation However teaching students to use skim reading as a strategic tool

for purposeful engagement and efficient yet thoughtful information filtering better equips them to navigate the rapidly changing information landscape and manage the fast paced flow of content from diverse media sources

How to Enhance Learning Efficiency When Online Learning is Popular and Indispensable: Theory, Research and Practice Rong Lian, Chang Liu, Juzhe Xi, 2024-07-17 Online learning has become more and more common globally whether for comfort adapting to work hours or just having the freedom to study from anywhere And now under the coronavirus pandemic as people are having to stay at home it has become more important than ever Although the popularity of wireless network and portable smart device makes it possible for people to acquire and learn knowledge anytime and anywhere it does not necessarily mean an increased learning performance Relevant research in cognitive science has revealed possible limitations in online learning For example the knowledge acquired through online learning tends to be fragmented and lacks guidance for integrated thinking among different subjects which makes it difficult for learners to form a systematic knowledge structure Learners may experience cognitive overload metacognitive illusion and low learning efficiency in self regulated learning It follows that in the post COVID 19 era online learning puts forward new requirements and challenges to the contemporary students not only to their learning strategies but positive character traits in learning Most of the current learning theories were developed in the early 20th century and may not fit in well with the current situation then possibly leading to inefficient learning and increased learning burden Therefore it is necessary and important to reexplore the influencing factors and mechanisms that affect the learning efficiency of students at all levels nowadays based on which we could construct a theoretical model of efficient learning model
