Warm-ups, Why? Just Tell Me the Answer! Tiffany Zammit, 2010 I have always been interested on the affects of a warm up Do warm ups serve a greater purpose besides getting a student thinking about math the second they walk in the door and keep them accountable for in classroom involvement This is a question I wanted to learn more about Also with the implementation of California State Testing computation is what gets answers but is it what makes the students fully understand The department exams are very computationally heavy and this study looks deeper into students using the warm up time to peer into what they are learning and inquire upon what and why instead of just how Thirty one students from two algebra 2 classes at a public high school were compared and contrasted in achievement based on warm up intervention In the 4th period class there was no change to the way that the warm ups were performed the questions and procedure stayed computational with direct instruction In the 7th period class the level of questioning changed to incorporate the level of understanding specified in my research question The intervention involved having students answer the questions without any direct instruction including more conceptual questioning to follow the computational questions There were daily warm ups presented and answered as well as closer problems quizzes and exams to asses the level of understanding and ability to answer more conceptual questions coinciding computational questions There were also pre and post survey data as an attitudinal example All of these things made up the assessment of what computational versus conceptual warm ups do to the algebra 2 students level of mathematical understanding Results showed that initially the students in the 7th period intervention class scored lower on pre assessments like closers and quizzes but their overall level of understanding surpassed that of 4th period by the time of the exam Not only were their answers more in depth but also their overall improvement was much greater than that of 4th period s and their overall test scores were higher The intervention also aided in student collaboration and problem solving as students found themselves forced to find answers and did aiding in their inquiry skills
