**Laying the Foundations** Marcus J. Wishart,Satoru Ueda,John D. Pisaniello,Joanne L. Tingey-Holyoak,Esteban Boj García,2020-12-03 Dam safety is central to public protection and economic security However the world has an aging portfolio of large dams with growing downstream populations and rapid urbanization placing dual pressures on these important infrastructures to provide increased services and to do it more safely To meet the challenge countries need legal and institutional frameworks that are fit for purpose and can ensure the safety of dams Such frameworks enable dams to provide water supplies to meet domestic and industrial demands support power generation improve food security and bolster resilience to floods and droughts helping to build safer communities Laying the Foundations A Global Analysis of Regulatory Frameworks for the Safety of Dams and Downstream Communities is a systematic review of dam regimes from a diverse set of 51 countries with varying economic political and cultural circumstances These case studies inform a continuum of legal institutional technical and financial options for sustainable dam safety assurance The findings from the comparative analysis will inform decisionmakers about the merits of different options for dam safety and help them systematically develop the most effective approaches for the country context By identifying the essential elements of good practices guided by portfolio characteristics this tool can help identify gaps in existing legal institutional technical and financial frameworks to enhance the regulatory regime for ensuring the safety of dams and downstream communities *Natural Resources and Environment*

U S Government Accountability Office (G,U. S. Government Accountability Office (,2013-07 The Corps of Engineers inspected about 1 800 non federal dams during 1978 in an effort to discover potentially hazardous conditions that threaten dam safety Many deficiencies were noted and remedial measures were recommended to dam owners and states There is a need to improve the nation s federal dams and guidelines are being developed to help coordinate the dam safety efforts of federal agencies The key safety issues to be resolved concern non federal dams The cooperation of dam owners and willingness of the states to continue efforts begun by the Corps non federal dam inspection program are needed however many dam owners lack the financial resources willingness or understanding to take recommended remedial measures and the states do not have legislative authority funds or trained personnel to conduct their own programs The study of five selected states showed that although some states have improved their programs many of the improvements such as hiring additional personnel and providing training are dependent upon financing by the Corps of Engineers and may not continue when the financial assistance program ends in 1981
