Damascus Steel:

On Damascus Steel Leo S. Figiel, 1991-01-01 *Damascus and Pattern-welded Steels* Madeleine Durand-Charre, 2014

Damascus steel was developed in the first millennium AD in India or Sri Lanka. Its reputation is related to its exceptional properties and also to the moiré pattern. A similar damask pattern could be obtained by forge welding, giving rise to controversies. Recent findings allow a better understanding of this pattern formation and revealed the secret of sophisticated forgings. This book presents in a first part observations of ancient blade samples examined with modern technologies such as electron microscopy. The characteristic features of many typical swords from different periods are discussed: Celtic, Merovingian, Viking, and oriental wootz swords, Persian shamshirs, Japanese katana, rapiers, etc. In the second part, microstructural observations at different levels of magnification are discussed. A specific chapter introduces the main transformations undergone by these steels during the forging processes. **Damascus Steel** Gunther Löbach, 2013
