## **Danger Death And Disaster:**

**Danger, Death and Disaster in the Crowsnest Pass Mines, 1902-1928** Karen Lynne Buckley, 2004 The Crowsnest Pass is famous for the tragic rock slide at Frank in 1903 but almost as famous are the many coal mining tragedies that afflicted the region in the early twentieth century With the discovery of a rich coal deposit in the region the area underwent an economic boom and a spike in population that is still evidenced today Unfortunately with this type of mining in rugged and often dangerous conditions comes the threat of disaster and occasionally death This book examines carefully the various calamities that have afflicted the area and considers the impact on the inhabitants and victims of these numerous tragedies Using original source material such as grave markers folk songs and oral histories the author portrays vividly the psychological and sociological features of both the individual and collective responses to death and danger giving the reader a unique picture of mining communities that is as true today as it was a century ago

**Law, Normative Pluralism, and Post-Disaster Recovery** Vivencio O. Ballano, 2017-09-14 This book looks at how the multiplicity of formal and informal normative systems that actualize the post disaster recovery goals of the country's Disaster Risk Reduction and Management Act of 2010 has resulted in the inadequate housing and relocation of Typhoon Ketsana victims in the Philippines Using the sociological and normative pluralist perspectives and the case study method it evaluates the level of conformity of the components of the housing project according to international conventions and legal standards It highlights the negative unintended consequences caused by the complex normative regimes of various competing stakeholders rigid real estate regulation and the unscrupulous involvement of powerful and corrupt real estate developers and housing groups as largely contributing to the project's deviation from the law's proactive objectives This book attempts to promote the socio legal perspectives which have long been overlooked in disaster research Finally it invites policymakers to enact a comprehensive disaster law and create a one stop disaster management agency to improve the long term rehabilitation of disaster victims in developing countries such as the Philippines
