Tsunamis Michael Woods, Mary B. Woods, 2007-01-01 You probably have seen regular waves at a beach Now imagine those waves being as tall as a 10 story building These waves are a tsunami Tsunamis are one of Earth's deadliest disasters They can flood cities ravage coastlines and carry people out to sea With dramatic images and first hand survivor stories plus the latest facts and figures this book takes you inside the terrifying waves of a tsunami

Earthquakes Michael Woods, Mary B. Woods, 2007-01-01 Earthquakes are difficult to predict One minute everything is normal The next the ground rumbles enough to rattle dishes in the cupboard or shakes so violently that buildings collapse There's an earthquake somewhere on earth every day Big quakes can topple buildings crumble homes and threaten the lives of thousands of people With dramatic images and first hand survivor stories plus the latest facts and figures this book takes you up close with some of the world's biggest earthquake disasters *Children's Books in Print, 2007, 2006* *Not Just Science* Zondervan, 2009-08-30 This book argues that it is possible for our study of the natural world to enhance our understanding of God and for our faith to inform and influence our study and application of science Whether you are a student someone employed in the sciences or simply an interested layperson Not Just Science will help you develop the crucial skills of critical thinking and reflection about key questions in Christian faith and natural science The contributors provide a systematic approach to both raising and answering the key questions that emerge at the intersection of faith and various disciplines in the natural sciences Among the questions addressed are the context limits benefits and practice of science in light of Christian values Questions of ethics as they relate to various applied sciences are also discussed The end

goal is an informed biblical worldview on both nature and our role in obeying God's mandate to care for his creation. With an honest approach to critical questions, *Not Just Science* fills a gap in the discussion about the relationship between faith and reason. This is a most welcomed addition to these significant scholarly conversations. Ron Mahurin, PhD, Vice President, Professional Development and Research Council for Christian Colleges/Universities.
