

The dangers of the US trade deal

April 2025

TRADE JUSTICE
MOVEMENT

The British government is negotiating a trade deal with the US administration which threatens important standards and regulations. This deal is being negotiated behind closed doors, but we know the US is interested in securing greater agricultural and pharmaceutical access to our markets - both of which threaten our standards and public services, and are deeply unpopular with the British public.

This briefing focuses, however, on what we know is definitely on the agenda for both governments: the liberalisation of digital and high tech sectors, including AI. This in itself poses risks to online

safety, competition policy, patient data, consumer safety and attempts to build a UK-based industry.

These talks are being undertaken in secret, without a public mandate and with no parliamentary scrutiny. We do not know whether MPs will be offered a debate or meaningful vote. This process falls far short of Britain's already deeply flawed process for agreeing trade deals.

We call on MPs to demand the power to scrutinise these talks, and to reject concessions like those laid out in this briefing.

What could the impacts of a UK-US trade deal be?

We have compiled these examples of what impact a trade deal could have on the basis of rules that exist in other trade agreements, on statements from the US administration and the demands of the US tech sector. A fuller version of this briefing is available at globaljustice.org.uk/big-tech.

Limiting our ability to tax big tech

The UK's digital services tax is projected to raise £5 billion by 2030, forcing notorious tax dodging big tech companies to pay tax on their activities in the UK. It's part of a global effort to force big corporations to pay their fair share into public coffers. But the US claims this tax treats US corporations unfairly and is demanding we drop it. We fear the government has already agreed to dilute the tax.

Impeding safety regulations

Digital trade rules would prevent regulators from having the right to see source code and algorithms, which increasingly drive large numbers of products. They'd be unable to understand the limitations and vulnerabilities of technologies that may be unsafe, unfair, or otherwise act against the public interest.

Entrenching monopoly power and inhibiting local industry

Trade rules make it harder to challenge monopoly practices and to carry out a successful industrial policy. They can mean a government is unable to force a company to establish a national presence, making it harder to hold them accountable. It would become harder to ensure local benefit as there would likely be proscriptions on controlling the size or type of participants in the market, on local content requirement, on preferences for types of technologies.

The US administration is unhappy about anti-competitive initiatives across Europe - such as demands for interoperable hardware or the 'right to repair' products. Under a trade deal, corporations would have more rights to challenge these initiatives.

Undermining public services and NHS data protection

Trade rules would give US companies additional rights to bid for contracts, including public service contracts. It would become harder to refuse tenders on any basis other than price. Governments could open themselves to challenge if they made decisions based on environmental or social justice criteria.

Dangers Of Free Trade:

The Dangers of "free Trade" John Mathew Culbertson,1985 Chances and Risks of Free Trade Policies Philipp Rothe,2020-08-13 Academic Paper from the year 2020 in the subject Economics Foreign Trade Theory Trade Policy language English abstract This paper examines the definition history and status of free trade in the world today In history a lot of countries acted in accordance with protectionist trade policies which means they had a lot of barriers tariffs and limits towards the trade with other countries The aim was to protect their own economy However in today s world there is much more free trade which means the buying and selling of goods without limits on the amount of goods that one country can sell to another and without special taxes on the goods bought from a foreign country The theory of free trade was first invented in 1776 by Adam Smith And although it goes back to colonial times free trade remained a theory for centuries Ever since Adam Smith s concept of free trade merchants tried to remove trade barriers between countries again and again But especially during the industrialization period the countries used trade barriers to boost their economy As late as after the second world war the US for example started to lower import tariffs The idea of lowering tariffs is that more trade takes place countries can specialize economically in what they do best and afterwards exchange these products for goods that they don t produce most efficiently or that they don t have easily available That in turn means the people are freer to choose their position in the economy the worlds resources are used more efficient and the wealth of nations is growing In a nutshell it means a country can compete in the global market by specializing to its fundamental economic strengths and by doing this increase economic growth Some international institutions such as the World Bank International Monetary Fund and the World Trade Organization WTO were founded to promote free trade in place of protectionism and so helped to build the world how it is today in terms of trading American Economist and Tariff League Bulletin ,1888 **Expanding NAFTA** Carmen Zechner,2002 The world economy has witnessed a sudden increase in free trade agreements generating a renewed debate on their economic impact In **Expanding NAFTA** Carmen Zechner focuses on the economic effects on Chile of the potential free trade agreement with the United States The author creates a framework for analyzing the impact of economic integration between a developed and a developing country from the developing country s perspective This book goes beyond earlier analyses of the static gains from free trade to examine the dynamic and more intangible effects that are critical to the welfare evaluation of trade agreements **Expanding NAFTA** is an important contribution to the research on preferential trade liberalization and to understanding developing countries trade policy choices This book will be indispensable to anyone interested in trade policy making and the Chilean economy **The Problem of Foreign Policy: a Consideration of Present Dangers and the Best Methods for Meeting Them** Gilbert Murray,1921 **Home Market Bulletin** ,1903 The Edinburgh Review ,1854 The Forum Loretta Sutton Metcalf,Walter Hines Page,Joseph Mayer Rice,Frederic Taber Cooper,Arthur Hooley,George Henry Payne,Henry Goddard Leach,1901 Current political social scientific education

Anne Uhlhaas,2003-03-13 Essay from the year 2001 in the subject Politics Topic Globalization Political Economics grade ECTS grade B 2 University of Leeds Institute for Politics and International Studies course North south Linkages language English abstract The posed question comprises three different issues which have to be investigated The first thing implied in this question is whether or not there are more arguments for or against global free trade both in theory and in practice Secondly we have to ask if real global free trade is being practised in our times The third issue deals with the question of how we should go on in the future Is global free trade worth being expanded or should we better tend to protectionism In this essay I will argue that although free trade is said to cause some unintentional side effects it is a better way of achieving economic and social development than protectionism Most of the problems concerning free trade only exist due to the fact that protectionist barriers set up by Northern countries still disturb a real free trade system and therefore constitute a disadvantage for developing countries I first want to work out the opportunities and benefits but also the challenges and problems of global free trade as they are seen in our times I will refer to the question of gains and losses for both industrialised and developing countries Firstly I want to look at economic effects and will then turn to political and environmental issues and to the linking of the recent terror attacks with free trade I will then ask the question how free trade is being practised today Finally I will sum up my results and will conclude with answering the question whether free trade is worth a greater expansion in the future or not **The Nation** ,1888 **A Handbook for Speakers and Students of the Policy of Tariff Reform and Imperial Preference** Tariff Reform League (London, England),1912 *International University Lectures: History.
