Smith,2017-07-05 During the period in which Expressionist artists were active in central Europe art historians were producing texts which also began to be characterized evocatively as expressionist yet the notion of an expressionist art history has yet to be fully explored in historiographic studies of the discipline This anthology offers a cross section of noteworthy art history texts that have been described as expressionist along with critical commentaries by an international group of scholars Written between 1912 and 1933 the primary sources have been selected from the published scholarship of both recognized and less familiar figures in the field s Germanic tradition Wilhelm Worringer Fritz Burger Ernst Heidrich Max Dvor Heinrich W lfflin and Carl Einstein Translated here for the first time these examples of an expressionist turn in art history along with their secondary analyses and the book s introduction offer a productive lens through which to re examine the practice and theory of art history in the early twentieth century **Die Schöpfer des**

The Twentieth Century German Art Exhibition Lucy Wasensteiner,2018-10-09 This book represents the first study dedicated to Twentieth Century German Art the 1938 London exhibition that was the largest international response to the cultural policies of National Socialist Germany and the infamous Munich exhibition Degenerate Art Provenance research into the catalogued exhibits has enabled a full reconstruction of the show for the first time its contents and form its contributors and their motivations and its impact both in Britain and internationally Presenting the research via six case study exhibits the book sheds new light on the exhibition and reveals it as one of the largest migr projects of the period which drew contributions from scores of German migr collectors dealers art critics and from the degenerate artists themselves The book explores the show s potency as an anti Nazi statement which prompted a direct reaction from Hitler himself 100 Jahre Kiepenheuer-Verlage Siegfried Lokatis,Ingrid Sonntag,2011 Pioneers of the Global Art Market Christel H. Force,2020-11-26 By the turn of the twentieth century Paris was the capital of the art world While this is usually understood to mean that Paris was the center of art production and trading this book examines a phenomenon that has received little attention thus far Paris based dealers relied on an ever expanding international network of peers Many of the city s galleries

capitalized on foreign collectors interest by expanding globally and proactively cultivating transnational alliances If the French capital drew artists from around the world from Cassatt to Picasso the contemporary art market was international in scope Art dealers deliberately tapped into a growing pool of discerning collectors in northern and eastern Europe the UK and the USA International trade was rendered not just desirable but necessary by the devastating effects of wars revolutions currency devaluation and market crashes which stalled collecting in Europe Pioneers of the Global Art Market assembles original scholarship based on a close inspection of and fresh perspective on extant dealer records It caters to an amplified curiosity concerning the emergence and workings of our unprecedented contemporary centric and global art market This anthology fills a significant gap in the expanding field of art market studies by addressing how initially contemporary art which is now known as historical modernism made its way into collections who validated what by promoting and selling it where and how It includes unpublished material concrete examples bibliographical and archival references and should appeal to academics curators educators dealers collectors artists and art lovers alike It celebrates the modern art dealer as transnational impresario the global reach of the modern art market and the impact of traders on the history of collecting and ultimately on the history of art
