**Natural Learning for a Connected World** Renate Nummela Caine, 2011-04-08 Why do video games fascinate kids so much that they will spend hours pursuing a difficult skill Why don't they apply this kind of intensity to their school work In their most penetrating and important work in years these two leaders in the field of brain based education build a bridge to the future of education with a dynamic model of teaching that works for all grade levels and in all cultural and ethnic groups The authors education model the Guided Experience Approach is based on the way that biologists see learning as a totally natural continuous interaction between perception and action Natural Learning for a Connected World provides a practical step by step description and successful examples from practice of this perception action cycle so that we can finally provide the learning environments essential for our children to thrive in the knowledge age *The Five-Year Party* Craig Brandon, 2010-08-17 Colleges look much the same as they did five or ten years ago but a lot has changed behind the scenes While some mixture of study and play has always been part of college life an increasing number of schools have completely abandoned the idea that students need to learn or demonstrate that they've learned Financial pressures have made college administrations increasingly reluctant to flunk anyone out regardless of performance although the average length of time to get a degree is now five years and for many students it's six or more Student evaluations of professors often linked to promotion and tenure decisions have made professors realize that applying tough standards or any standards only hurts their own career progress For many professors it's become easier and more rewarding to focus on giving entertaining lectures and to give everyone reasonably good grades The worst of these schools are the subprime colleges where performance standards and accountability have been completely abandoned Students enjoy a five year party with minimal responsibilities while their parents pay the bills These schools investment decisions first class gyms and dining centers are all geared to attracting students that want to have a good time and their brochures all emphasize the fun aspects of the college experience there are very few pictures of students actually studying or in class And after graduation former students are frequently unable to find work in their chosen fields thanks to their school's reputation with employers and unable to afford the payments on sizeable student loans The subprime colleges which teach a significant percentage of college students are only the tip of the iceberg All colleges even the most elite have moved in this direction to some extent If you are a parent sending your child to college The Five Year Party will give you critical information you need about what is really happening at your child's college and what you can do to ensure help your child gets a real education *When Kids Ask Hard Questions* Bromleigh McCleneghan, Karen Ware Jackson, 2019-10-08 The world is a confusing and painful place for children and adults How do you respond faithfully to your kids big questions Learn to craft faithful conversations and be better prepared to talk about the tough stuff with your kids More than 30 essays from a diverse group of young Christian parents pastors address today's toughest topics including gender race bullying mental illness death divorce money technology and generosity When Kids Ask

Shackelford,2024-06-28 The Routledge International Handbook of Changes in Human Perceptions and Behaviors is the first edited volume to present multidisciplinary perspectives on various aspects of changes that humans experience The handbook is designed to highlight the different contents types ways meanings applications and moments of changes that have been recognized by experts in various fields within the life and social sciences Comprised of four sections the chapters address changes in a variety of contexts related to human perceptions and behaviors the moment of change and fluctuations changes in applied settings and the meaning of changes including resistance to change Written by a range of expert international contributors the book brings together discussions and insights about how different levels and types of changes in human perceptions attitudes beliefs values and behaviors have been studied and considered in diverse fields It also explores the various mechanisms that account for changes exploring how and when changes occur and what changes mean to humans Relevant for empirical and theoretical work the handbook will be of great interest to researchers academics and postgraduate students across psychology behavioral sciences and social sciences *When Comedy Goes Wrong* Christopher J. Gilbert,2025-04-01 While conventional wisdom has it that humor embodies a spirit of renewal and humility a dispirited form of comedy thrives in a media saturated and politically charged environment When Comedy Goes Wrong examines how beginning in the late twentieth and carrying into the early twenty first century a certain comic dispirit found various platforms for disheartening cultural politics From the calculated follies on talk radio programs like the Rush Limbaugh Show through the charades of cancel culture and ultimately to so called Alt Right comedy the transgressions improprieties and ego trips endemic to a newfangled comic freedom produced entirely unfunny ways of being To understand these unfunny ways Christopher J Gilbert challenges the prevailing belief in humor s goodness analyzing radio personalities meme culture films civil unrest and even the language of ordinary individuals and everyday speech all to demonstrate what happens when humor becomes humorless

As such Gilbert imagines a nuanced sense of humor for a tumultuous world Ultimately When Comedy Goes Wrong transcends partisanship to explore the uglier parts of American culture imagining the stakes of doing comedy and being comical as a means of survival

**Overcoming Adversity: The 2010 NBA All-Stars** Tex Greene,2023-11-09 Why are these grown men getting paid millions of dollars to play a child's game Inevitably if you've been around the game of basketball long enough you've heard some cynical adult ask this question It seems fair getting paid millions to play basketball every night in front of adoring fans does sound like one of the easiest gigs in the world But there's a lot more to it than that No one has an easy journey to reap the rewards waiting for them at the highest level of basketball Only 3 percent of high school athletes earn scholarships to play in college and only 0.03 percent turn pro Of those 0.03 percent there are only so many who have successful careers make the millions players dream of and don't go broke almost immediately after retiring There's plenty of elite hoopsters but to make it to the highest level of basketball you have to be the best in the world One thing all the elite players have in common are insane work ethics and sometimes some luck in genetics Inside this book you'll find stories of the relentless work and hours that these stars have put in when all the lights are shut off no one's watching and it's just them and the basketball Because when basketball is someone's only ticket out of a rough life gang wars drugs and violence you won't believe how good at the game they'll become
