Cunliffe, Wendy Davies, Colin Renfrew, 2002 Twenty six leading scholars from around the world have come together to celebrate the strengths the energies and the sheer intellectual excitement of their discipline They unashamedly proclaim that over the last hundred years archaeology has transformed itself from a genteel antiquarian pursuit deeply rooted in the classical tradition to a rigorous and demanding discipline spanning the humanities and the sciences yet at the same time one widely accessible to the public at large The contributors show how our understanding of the past has changed reveal the exciting ideas under current debate and offer their visions of the future The result is a remarkable overview of world archaeology focusing on new and unexpected themes at the cutting edge of the discipline The Quest for the Historical Israel Israel Finkelstein, Amihay Mazar, International Institute for Secular Humanistic Judaism. Colloquium, 2007-10-24 An engaging series of essays originally given at the International Institute for Secular Humanistic Judaism The aim of the colloquium was to make available the results of recent archaeological work to a wider interested public and specifically to bring science to bear on the early history of the Jewish people **A Crisis of Exile** Dr. Brian Schumann, 2015-12-15 The concept of one God monotheism is a basic fundamental part of our culture and beliefs today However it has not always been that way Even the early Israelite people went wayward and worshiped other gods Yahweh was only a single God on the pantheon A Crisis of Exile delves into the biblical archaeological and historical records to uncover what the religion of Ancient Israel was really like Moreover it reveals how the Babylonian Exile became the catalyst for propelling the Israelites into monotheism **Cultures of Mobility, Migration, and Religion in Ancient Israel and Its World** Eric M. Trinkaus, 2022-02-27 This book examines the relationship between mobility lived religiosities and conceptions of divine personhood as they are preserved in textual corpora and material culture from Israel Judah Egypt and Mesopotamia By integrating evidence of the form and function of religiosities in contexts of mobility and migration this volume reconstructs mobility informed aspects of civic and household religiosities in Israel and its world Readers will find a robust theoretical framework for studying cultures of mobility and religiosities in the ancient past as well as a fresh

[Food in Ancient Judah](#) Cynthia Shafer-Elliott, 2014-09-11 First published in 2013 The study of food in the Hebrew Bible and Syro Palestinian archaeology has tended to focus on kosher dietary laws the sacrificial system and feasting in elite contexts More everyday ritual and practice the preparation of food in the home has been

overlooked Food in Ancient Judah explores both the archaeological remains and ancient Near Eastern sources to see what they reveal about the domestic gastronomic daily life of ancient Judahites within the narratives of the Hebrew Bible Beyond the findings the methodology of the study is in itself innovative Biblical passages that deal with domestic food preparation are translated and analysed Archaeological findings and relevant secondary resources are then applied to inform these passages Food in Ancient Judah reflects both the shift towards the study of everyday life in biblical studies and archaeology and the huge expansion of interest in food history it will be of interest to scholars in all these fields

From Primitives to Primates David Van Reybrouck, 2012 Where do our images about early hominids come from In this fascinating in depth study David Van Reybrouck demonstrates how input from ethnography and primatology has deeply influenced our visions about the past from the 19th century to this day often far beyond the available evidence Victorian scholars were keen to look at contemporary Australian and Tasmanian aboriginals to understand the enigmatic Neanderthal fossils Likewise today's primatologists debate to what extent bonobos baboons or chimps may be regarded as stand ins for early human ancestors The belief that the contemporary world provides living links still goes strong Such primate models Van Reybrouck argues continue the highly problematic comparative method of the Victorian times He goes on to show how the field of ethnoarchaeology has succeeded in circumventing the major pitfalls of such analogical reasoning A truly interdisciplinary study this work shows how scholars working in different fields can effectively improve their methods for interpreting the deep past by understanding the historical challenges of adjacent disciplines Overviewing two centuries of intellectual debate in fields as diverse as archaeology ethnography and primatology Van Reybrouck's book is one long plea for trying to understand the past on its own terms rather than as facile projections from the present David Van Reybrouck Bruges 1971 was trained as an archaeologist at the universities of Leuven Cambridge and Leiden Before becoming a highly successful literary author The Plague Mission Congo he worked as a historian of ideas For more than twelve years he was co editor of Archaeological Dialogues In 2011-12 he held the prestigious Cleveringa Chair at the University of Leiden
