## **Decision Making In Cardiothoracic Surgery:**

*Decision Making in Cardiothoracic Surgery* Lawrence H. Cohn, Donald B. Doty, Richard B. McElvein, 1988      **Difficult**

**Decisions in Thoracic Surgery** Mark K. Ferguson, 2020-07-02 This updated volume provides a practical guide to decision making within thoracic surgery Focussed chapters contain pithy analyses and recommendations that allow useful information to be identified at a glance All new chapters bring insight into the challenges faced operating on the lung esophagus diaphragm airway pleura mediastinum and chest wall **Difficult Decisions in Thoracic Surgery** aims to help the reader navigate the complexities of thoracic surgery through clearly formatted and evidence based chapters The book is relevant to practicing and trainee surgeons as well as medical professionals working within thoracic surgery      **Difficult Decisions in Thoracic Surgery** Mark K. Ferguson, 2007-03-12 Why do thoracic surgeons need training in decision making Many of us who have weathered harrowing residencies in surgery feel that after such experiences decision making is a natural extension of our selves While this is no doubt true correct de sion making is something that many of us have yet to master The impetus to develop a text on evidence based decision making in thoracic surgery was stimulated by a conference for cardiothoracic surgical trainees developed in 2004 and sponsored by the American College of Chest Physicians During that conference it became clear that we as thoracic surgeons are operating from a very limited fund of true evidence based information What was also clear was the fact that many of the decisions we make in our everyday practices are not only uninformed by evidence based medicine but often are contradictory to existing guidelines or evidence based recommendations The objectives of this book are to explain the process of decision making both on the part of the physician and on the part of the patient and to discuss speci c clinical problems in thoracic surgery and provide recommendations regarding their mana ment using evidence based methodology Producing a text that will purportedly guide experienced practicing surgeons in the decision making process that they are acc tomed to observe on a daily basis is a daunting task      *Decision Making in Thoracic Surgery* Wickii T Vigneswaran, John Odell, 2018-06-30 Presented in an algorithmic approach this book is a practical guide to thoracic surgery Beginning with discussion on preoperative physical examination the following sections cover surgery for different regions of the thoracic system based on step by step evaluation of patient history physical examination investigation and diagnosis leading to a decision on the appropriate surgical procedure The text covers the chest wall pleura mediastinum trachea lung and oesophagus with a final section on lung donation and transplantation Authored by recognised US based experts from Loyola University Health System Maywood IL and Mayo Clinic Jacksonville FL the text is further enhanced by clinical photographs diagrams and tables Key points Practical guide to decision making in thoracic surgery Presented in a step by step algorithmic approach Includes section on lung transplantation Recognised US based author team

**Sensing, Modeling and Optimization of Cardiac Systems** Hui Yang, Bing Yao, 2023-08-18 This book reviews the development of physics based modeling and sensor based data fusion for optimizing medical decision making in connection

with spatiotemporal cardiovascular disease processes To improve cardiac care services and patients quality of life it is very important to detect heart diseases early and optimize medical decision making This book introduces recent research advances in machine learning physics based modeling and simulation optimization to fully exploit medical data and promote the data driven and simulation guided diagnosis and treatment of heart disease Specifically it focuses on three major topics computer modeling of cardiovascular systems physiological signal processing for disease diagnostics and prognostics and simulation optimization in medical decision making It provides a comprehensive overview of recent advances in personalized cardiac modeling by integrating physics based knowledge of the cardiovascular system with machine learning and multi source medical data It also discusses the state of the art in electrocardiogram ECG signal processing for the identification of disease altered cardiac dynamics Lastly it introduces readers to the early steps of optimal decision making based on the integration of sensor based learning and simulation optimization in the context of cardiac surgeries This book will be of interest to researchers and scholars in the fields of biomedical engineering systems engineering and operations research as well as professionals working in the medical sciences

*Digital Health Technologies for Shared Decision Making* Marcus Cheetham, Christoph A. Meier, Nikola Biller-Andorno, Helena Canhao, Anna Lisa Martin-Niedecken, Annina Gähwiler, 2025-05-22 Patient decision aids provide a promising means to empower patients to prepare and participate in Shared Decision Making SDM with health care professionals A wide range of clinically validated and non validated digital and non digital patient decision aids continue to be developed for use in diverse settings and clinical interventions The end users of a given aid may be heterogeneous in their needs abilities backgrounds and personal characteristics Many patient decision aids are developed with the aim of helping patients clarify and communicate their subjective values and preferences in relation to the medical choices at hand Knowledge of these values and preferences can help patients and health care professionals determine the medical intervention that is right for the patient Digital health technologies present unique opportunities for creating new ways to advance the design adoption usage and evaluation of patient centred decision aids and support the clarification and communication of subjective values and preferences However there is a dearth of systematic research on these opportunities This Research Topic focuses on the current use of and the opportunities that digital technologies present for furthering the

design development deployment and usefulness of patient decision aids Potential themes include but are not limited to 1 Digital technology and patient decision aids 2 New approaches designs developments and innovations 3 Human factors in elucidating subjective values and preferences 4 Awareness and real world use of digital patient decision aids 5 Usability and acceptability of digital patient decision aids 6 Current and potential applications in different settings 7 Barriers and facilitators to use of digital technology in SDM 8 Future possibilities and challenges of patient decision aids and digital technology 9 Inclusion diversity and accessibility of patient decision aids with digital technology and 10 Ethical technical and regulatory design considerations This Research Topic welcomes original research review method and theory and perspective articles that address the diversity of themes around digital health technologies and human factors in patient decision aids Brief research reports and mini reviews are also encouraged Articles types should be selected that correspond with the stage of research and scope of the contribution
