Knowledge-Based Intelligent Information and Engineering Systems Vasile Palade, 2003-08-28 During recent decades we have witnessed not only the introduction of automation into the work environment but we have also seen a dramatic change in how automation has influenced the conditions of work While some 30 years ago the addition of a computer was considered only for routine and boring tasks in support of humans the balance has dramatically shifted to the computer being able to perform almost any task the human is willing to delegate The very fast pace of change in processor and information technology has been the main driving force behind this development Advances in automation and especially Artificial Intelligence AI have enabled the formation of a rather unique team with human and electronic members The team is still supervised by the human with the machine as a subordinate associate or assistant sharing responsibility authority and autonomy over many tasks The requirement for teaming human and machine in a highly dynamic and unpredictable task environment has led to impressive achievements in many supporting technologies These include methods for system analysis design and engineering and in particular for information processing for cognitive and complex knowledge 1 engineering

Hanley, 1997 This book provides a forum for research and applications dealing with the design the development and the implementation of decision support systems in the manufacturing domain The book brings together contributions from leading experts in the field It will appeal to all those concerned with decision support for manufacturing      **Decision Support Systems** Ger Devlin, 2010-03-01 This book by In Tech publishing helps the reader understand the power of informed decision making by covering a broad range of DSS Decision Support Systems applications in the fields of medical environmental transport and business The expertise of the chapter writers spans an equally extensive spectrum of researchers from around the globe including universities in Canada Mexico Brazil and the United States to institutes and universities in Italy Germany Poland France United Kingdom Romania Turkey and Ireland to as far east as Malaysia and Singapore and as far north as Finland Decision Support Systems are not a new technology but they have evolved and developed with the ever demanding necessity to analyse a large number of options for decision makers DM for specific situations where there is an increasing level of uncertainty about the problem at hand and where there is a high impact relative to the correct decisions to be made DSS s offer decision makers a more stable solution to solving the semi structured and unstructured problem This is exactly what the reader will see in this book      *Foundations of Decision Support Systems* Robert H. Bonczek, Clyde W. Holsapple, Andrew B. Whinston, 2014-05-10 Foundations of Decision Support Systems focuses on the frameworks strategies and techniques involved in decision support systems DSS The publication first takes a look at information processing decision making and decision support frameworks for organizational information processing and decision making and representative decision support systems Discussions focus on classification scheme for DSS abilities required for decision making division of information processing labor within an organization and decision support The text then elaborates on ideas in decision support formalizations of purposive systems and conceptual and operational constructs for building a data base knowledge system The book takes a look at building a data base knowledge system language systems for data base knowledge systems and problem processing systems for data base knowledge systems Topics include problem processors for computationally oriented DSS major varieties of logical data structures and indirect associations among concepts The manuscript also examines operationalizing modeling knowledge in terms of predicate calculus combining the data base and formal logic approaches and the language and knowledge systems of a DSS based on formal logic The publication is a valuable reference for researchers interested in decision support systems      DECISION SUPPORT SYSTEMS: THE INTERNATIONAL JOURNAL , 1998      Decision Support Systems for Sustainable Development Gregory E. Kersten, Zbigniew Mikolajuk, Anthony Gar-On Yeh, 2006-03-01 In recent years much work has been done in formulating and clarifying the concept of sustainable development and related theoretical and research issues Now the challenge has shifted

to designing and stimulating processes of effective planning and decision making at all levels of human activity in such a way as to achieve local and global sustainable development Information technology can help a great deal in achieving sustainable development by providing well designed and useful tools for decision makers One such tool is the decision support system or DSS This book explores the area of DSS in the context of sustainable development As DSS is a very new technique especially in the developing world this book will serve as a reference text primarily for managers government officials and information professionals in developing countries It covers the concept of sustainable development defines DSS and how it can be used in the planning and management of sustainable development and examines the state of the art in DSS use Other interested readers will include students teachers and analysts in information sciences DSS designers developers and implementors and international development agencies
