March, 2009-01-23 Building on lecture notes from his acclaimed course at Stanford University James March provides a brilliant introduction to decision making a central human activity fundamental to individual group organizational and societal life March draws on research from all the disciplines of social and behavioral science to show decision making in its broadest context By emphasizing how decisions are actually made as opposed to how they should be made he enables those involved in the process to understand it both as observers and as participants March sheds new light on the decision making process by delineating four deep issues that persistently divide students of decision making Are decisions based on

rational choices involving preferences and expected consequences or on rules that are appropriate to the identity of the decision maker and the situation Is decision making a consistent clear process or one characterized by ambiguity and inconsistency Is decision making significant primarily for its outcomes or for the individual and social meanings it creates and sustains And finally are the outcomes of decision processes attributable solely to the actions of individuals or to the combined influence of interacting individuals organizations and societies March s observations on how intelligence is or is not achieved through decision making and possibilities for enhancing decision intelligence are also provided March explains key concepts of vital importance to students of decision making and decision makers such as limited rationality history dependent rules and ambiguity and weaves these ideas into a full depiction of decision making He includes a discussion of the modern aspects of several classic issues underlying these concepts such as the relation between reason and ignorance intentionality and fate and meaning and interpretation This valuable textbook by one of the seminal figures in the history of organizational decision making will be required reading for a new generation of scholars managers and other decision makers

This in turn can contribute an overall improvement in your happiness, relationships, finances, education, and employment. Dr. Rodgers' breakthrough analysis of decision making should be mandatory reading for anyone managing people or negotiating transactions. Hank Adler, C.P.A., accounting professor at Chapman University and retired partner at Deloitte Touche, I think your formulaic approach to decision making will make it much easier for people to make correct choices. Your approach forces decision makers to address the role their own subjective feelings and perceptions have upon the process. It thereby makes the choice much more objective and rational. Randall L. Erickson, J.D., partner in the California office of Crowell Moring and chair of the firm's construction group.

Smart Decisions Thomas N. Martin, 2016-04-29. Today's world is complex and getting more so each day. Huge multinational corporations, international crisis, and fast-breaking events require most people to make decisions on a daily basis without the tools to understand the long-term impact that today's decision might create. Because most people have never really been trained in how to make important, complex decisions, most people rely on experience and gut reaction, which is okay for many decisions but not okay for decisions that will have meaningful impact on organizations and individuals. Decision makers need to develop the art and science of strategic decision making. Here, Professor Thomas Martin explains the need for decision makers to modify their thinking about how they deal with acquiring and analyzing information in each of the decision making process steps. This approach, requiring thinking modification, will lengthen the process, make it more complex, and to some, more arduous, but the

comprehensiveness of the new thinking approach should lead to improved and more effective decision making In this book Dr Martin presents a thinking modification framework that asserts that in the decision making process there are three situational states a current state future state and a transitional state that one must deliberate in finding a solution For each of these situational states Martin develops an identical five step process to determine the best decision to make The steps of this process include Change Needing Situational Analysis Challenge Framing Causal Analysis Generating Solution Ideas Choosing a Solution Set Implementation and Aftermath Planning This book will appeal to decision makers leaders and students of management who want a specific framework that details the process behind making strategic well informed decisions
