Decision Making under Uncertainty Kerstin Preuschoff,Peter N. C. Mohr,Ming Hsu,2015-06-16 Most decisions in life are based on incomplete information and have uncertain consequences To successfully cope with real life situations the nervous system has to estimate represent and eventually resolve uncertainty at various levels A common tradeoff in such decisions involves those between the magnitude of the expected rewards and the uncertainty of obtaining the rewards For instance a decision maker may choose to forgo the high expected rewards of investing in the stock market and settle instead for the lower expected reward and much less uncertainty of a savings account Little is known about how different forms of uncertainty such as risk or ambiguity are processed and learned about and how they are integrated with expected rewards and individual preferences throughout the decision making process With this Research Topic we aim to provide a deeper and more detailed understanding of the processes behind decision making under uncertainty

Identity Economics Meral Uzunöz Altan,Meltem İnce Yenilmez,Oğuzhan Altınkoz,Sinem Bağçe,2024-07-08 Critics contend that identity economics overemphasizes social identities

as drivers of economic activity potentially obscuring other elements including personal preferences incentives and market pressures Identity related notions are challenging to measure and quantify meaningfully and rigorously which is one of the most common criticisms Identity economics has long been debated by economic scientists and practitioners but it is still considered to be in its infancy which also draws attention to the absence of a clear consensus and solid empirical support This book fills that gap by providing an in depth analysis of the main claims made in favour of identity economics It explores the reliability of identity based explanations the difficulties with measurement and quantification concerns about overgeneralization and essentialism the function of economic institutions policy implications a lack of agreement and empirical evidence and considerations of intersectionality and multidimensionality The book considers three interrelated aims Firstly it familiarizes readers with the concept of Identity Economics Secondly and essentially it persuades a larger audience of the relevance and creativity of this sector and thirdly it advocates for the applicability of the approach to the field of knowledge The focus of the examination centres around these three objectives Few would argue that identity impacts our decisions but given that solid theory is predicated on good abstraction the real question is whether we lose anything by excluding identity from the theory The book skilfully weaves together the literature from several disciplines including regional gender labour social areas of studies thus academics students and researchers in these fields will find the individual contributions useful for their respective areas of study
