Challenges Bequeathed ,2009-01-01 In this thoughtful and provocative collection of essays a group of scholars from varied backgrounds and interests have each taken up the educational challenges bequeathed by Dwayne Huebner in his 1996 essay Challenges Bequeathed Huebner encouraged educators to surpass the technical foundations of education affirm the significance of the imagination use the world's intellectual traditions and achievements engage in public discourse about education and speak out for children and youth Each author has extended and in some ways transcended the discussion of these five challenges yet still draw upon the considerable contribution Dwayne Huebner has made to the field of education The writers in this volume grapple with the complexities of teaching and learning as always in process and as always relational of schools as sites of creative and imaginative acts of knowing and being The book begins with Huebner's 1996 essay wherein he delineates the challenges for educators as he perceived them Readers are invited to begin with this chapter However after taking in Professor Huebner's prescience his ability to see years in advance of everyone else what is deeply at work in present times where it is headed and what needs to be done about it Smith this volume we encourage readers to dip into this volume randomly rather than in sequential order While doing so it is important to be mindful that these challenges do not exist in isolation of each other rather they are inextricably linked in myriad ways Each one of these challenges requires consideration of classroom spaces the individuals who occupy these spaces and how these spaces are influenced by external forces Tupper this volume We invite you to take up a challenge

Bernard Stiegler and the Philosophy of Education Joff P.N. Bradley,David Kennedy,2021-05-13 This book is the first of its kind to critically examine the philosophy of Bernard Stiegler from the perspective of the philosophy of education The editors of this book firmly believe that in the

coming years Stiegler's philosophy will assume increasing importance and influence in both digital studies and the philosophy of education as his thought is a prism through which to understand how we live and work and a means to anticipate what the future may hold for us all in the time of the Anthropocene. They are of the view that Stiegler's work will have a permanent impact on the intellectual terrain of the twenty-first century as his majestic conceptual architectonic will shape political, social, and pedagogical debates in the coming decades. With this in mind, the contributors of this book take up his gauntlet to understand the risks and opportunities of the digital pharmakon and its impact on the educational milieu. The chapters in this book were originally published as a special issue of *Educational Philosophy and Theory*.

Dancing with Doctoral Encounters Yusef Waghid, 2014-10-01 This book offers an exposition of the author's professional encounters with doctoral candidates. In reflecting upon his supervision of these candidates, individuals each with their own ideas, the author likened these unique relationships with a dance.

Technologies of Life and Death Kelly Oliver, 2013-06-05 The central aim of this book is to approach contemporary problems raised by technologies of life and death as ethical issues that call for a more nuanced approach than mainstream philosophy can provide. To do so, it draws on the recently published seminars of Jacques Derrida to analyze the extremes of birth and dying insofar as they are mediated by technologies of life and death. With an eye to reproductive technologies, it shows how a deconstructive approach can change the very terms of contemporary debates over technologies of life and death, from cloning to surrogate motherhood to capital punishment, particularly insofar as most current discussions assume some notion of a liberal individual. The ethical stakes in these debates are never far from political concerns such as enfranchisement, citizenship, oppression, racism, sexism, and the public policies that normalize them. *Technologies of Life and Death* thus provides pointers for rethinking dominant philosophical and popular assumptions about nature and nurture, chance and necessity, masculine and feminine, human and animal, and what it means to be a mother or a father. In part, the book seeks to disarticulate a tension between ethics and politics that runs through these issues in order to suggest a more ethical politics by turning the force of sovereign violence back against itself. In the end, it proposes that deconstructive ethics with a psychoanalytic supplement can provide a corrective for moral codes and political clichés that turn us into mere answering machines.

Unlocking the World Claudia W. Ruitenberg, 2015-12-03 *Unlocking the World* proposes hospitality as a guiding ethic for education. Based on the work of Jacques Derrida, it suggests that giving place to children and newcomers is at the heart of education. The primary responsibility of the host is not to assimilate newcomers into tradition but rather to create or leave a place where they may arrive. Hospitality as a guiding ethic for education is discussed in its many facets, including the decentered conception of subjectivity on which it relies, the way it casts the relation between teacher and student, and its conception of curriculum as an inheritance that asks for a critical reception. The book examines the relation between an ethic of hospitality and the educational contexts in which it would guide practice. Since these contexts are marked by gender, culture, and language, it asks how such differences affect

enactments of hospitality Since hospitality typically involves a power difference between host and guest the book addresses how an ethic of hospitality accounts for power whether it is appropriate for educational contexts marked by colonialism and how it might guide education aimed at social justice **Derrida: A Guide for the Perplexed** Julian Wolfreys, 2007-07-24

This guide provides students with a clear unthreatening introduction to Derrida the key concepts and ideas associated with his work and the major subjects he addresses *Gender, Definitional Politics and 'Live' Knowledge Production* Emily F.

Henderson, 2019-06-17 Waking up to the reactivity of concepts to their myriad possibilities for signification to the range and strength of affective responses they provoke can happen at any time in any place Conceptual contestations shake up the comfortably consolidated foundations of sociological knowledge production but they also have consequences for the ways in which lives are understood researched and legislated for This book is dedicated to exploring the definitional politics which surround the concept of gender in live knowledge production While conferences remain an under researched phenomenon this volume places conference knowledge production under the spotlight conferences in particular national women s studies association conferences in the UK the US and India are explored as sites where definitional politics play out The cumulative theorisation of live conceptual knowledge production that is developed throughout the book draws on established constructs such as performativity citationality intersectionality materiality and events but works with them in combination in a new unique way The book as a whole calls for more attention to be paid to conceptual knowledge production so as to make more space for potentially transformative conceptual change **Academic Activism in Higher Education** Nuraan Davids, Yusef

Waghid, 2021-03-24 This book argues for renewed understandings of academic activism understandings that conceive of the ideas arguments and scholarship of the academe as embedded within the practices of what the academy does It examines why and how a renewed notion of academic activism informs a philosophy of higher education specifically in relation to teaching and learning The book focuses on the theories and practices of teaching and learning in particular how such pedagogical actions are guided by social political and cultural influences outside of the university as a higher education institution The authors advocate for a living philosophy of higher education that is commensurate with real actions and imaginary fictions of what constitutes higher education and what remains in becoming for the discourse With a focus on South African social justice education the book imagines pathways for academic activism to manifest in revolutionised pedagogical actions or actions that bring into contestation what already exists with the possibility for the cultivation of renewal Knowledge Economy, Development and the Future of Higher Education Michael A. Peters, 2007 This book

reflects on the post war Western university and its discourses charting the crisis of the concept of the modern university Edutopias Michael A. Peters, D. John Freeman-Moir, 2006 This unique collection of essays by well known scholars from around the world examines the role of edutopias in the utopian tradition examining its sources and sites as a means for understanding the aims and purposes of education for realizing its societal value and for criticizing its present economic

technological and organizational modes Joyce in the Belly of the Big Truck; Workbook Joyce A. Cascio, 2005-05

Knowledge Policy Greg Hearn, David Rooney, 2008 Knowledge Policy illustrates how the production of knowledge has become central to economic life and that competitiveness in the 21st century market place is characterized by the ability to translate scientific and technological knowledge into innovation Does this therefore render cultural and social knowledge unimportant The contributors attempt to answer this and other important questions using a broader epistemological base for the term knowledge Policy implications are then developed from this perspective By examining long term challenges this unique book explains what we actually mean by the term knowledge and raises fundamental critiques of existing conceptions of knowledge It argues that fresh policy thinking is needed not only in more obviously knowledge intensive sectors but also across all areas of knowledge production By way of illustration the effects of the different dynamics of the knowledge era on defence health employment environment indigenous and international relations multiculturalism and urban policy are explored The book then addresses the enduring question of whether it is possible to produce too much knowledge at the expense of wisdom Providing a thorough treatment on the meaning production and application of knowledge this book will provide a fascinating read for academics researchers students practitioners and policymakers with an interest in public policy and knowledge based economies

The Lost Dream of Equality Alan Scott, D. John Freeman-Moir, 2007 This book examines the international hopes for equality in education over the past 60 years by looking at the current evidence and theory on social class and schooling For more than half a century the relation between social class and education has been the subject of intense debate and political struggle as well as the focus for the aspirations of millions of citizens and their children in Western democracies This book will be relevant to teachers advanced undergraduates and graduate students in the areas of the history sociology and politics of education as well as policy analysis and applied social theory The Writers Directory ,2013 *Deconstructing Popular Culture* Paul Bowman, 2008-09-10 How can the study of pop music TV and film give insight into issues of culture This book shows how deconstruction theory allows us to read and interpret the popular

culture that surrounds us Applying complex theory to recognizable examples Paul Bowman turns deconstruction into an indispensable tool for all students of Cultural Studies
