Psychology helps us to explain why questions around children and childhood their safety their sexuality their interests and abilities their violence have so preoccupied the late twentieth and twenty first centuries In this increasingly post industrial post colonial and multicultural world this book identifies analytical and practical strategies for improving how we think about and work with children Drawing in particular on feminist and postdevelopment literatures the book illustrates how and why reconceptualising our notions of individual and human development including those informing models of children s rights and interests will foster more just and equitable forms of professional practice with children and their families The book brings together completely new previously unpublished material alongside revised and updated papers to present a cutting edge and integrated perspective to the field Burman offers a key contribution to a set of urgent debates engaging theory and method policy and practice across all the disciplines that work with or lay claim to children s interests Developments presents a coherent and persuasive set of arguments about childhood culture and professional practice so that the sustained focus across a range of disciplinary arenas psychology education cultural studies child rights gender studies development policy and practice social policy strengthens the overall argument of each chapter It will be invaluable to teachers and students in psychology childhood studies and education as well as researchers in gender studies It will also be a must read for professionals working with children and adolescents

The Psychological Development of Girls and Women Sheila Greene, 2014-11-27 Choice Recommended Read This thoroughly revised new edition updates Sheila Greene s original transformative account of the psychological development of girls and women and the central role of time in shaping human experience Greene critically reviews traditional and contemporary theoretical approaches ranging from orthodox psychoanalysis to relational and post modern theories and argues that even those that claim to focus on development have presented a view of women s lives as fixed and determined by their nature or their past These theories she believes should be rejected because of their inherent lack of validity and their frequently oppressive implications for women Essential but often neglected insights from the more compelling developmental and feminist theories are woven together within a theoretical framework that emphasizes temporality emergence and human agency The result is a liberating theory of women s psychological development as constantly emerging and changing in time rather than as static and fixed by their nature socio cultural context and personal history Updated for a new generation of readers The Psychological Development of Girls and Women will continue to be essential reading for students and researchers in the psychology of women developmental psychology and women s studies

Different Childhoods Lindsay O'Dell, Charlotte Brownlow, Hanna Bertilsdotter-Rosqvist, 2017-10-10 Different Childhoods Non Normative Development and Transgressive Trajectories opens up new avenues for exploring children s development as contextual provisional and locally produced rather than a unitary universal and consistent process This edited collection frames a critical exploration of the trajectory against which children are seen to be different within three key themes deconstructing developmental tasks locating development and the limits of

childhood Examining the particular kinds of transgressive development contributors discuss instances of difference including migration work assumptions of vulnerability trans childhoods friendships and involvement in crime Including both empirical and theoretical discussions the book builds on existing debates as part of the interrogation of different childhoods This book provides essential reading for students wishing to explore notions of development while also being of interest to both academics and practitioners working across a broad area of disciplines such as developmental psychology sociology childhood studies and critical criminology

The Child and the World Jana Tabak, 2020 However unthinkable child soldiers may be within a generalized conception of childhood they are not imaginary figures rather they are a constant in almost every armed conflict around the world The participation of children in wars may question the idea of childhood as a once upon a time story with a happy and predictable ending disrupting the natural idea of a protected and innocent childhood and also eliciting fear uncertainty revulsion horror and sorrow Using the perspectives of both childhood studies and critical approaches to international relations Jana Tabak explores the constructions of child soldiers as children at risk and at the same time risky children More specifically *The Child and the World* aims both to problematize the boundaries that articulate child soldiers as necessarily deviant and pathological in relation to normal children and to show how these specific limits participate in the re production and promotion of a particular version of the international political order In this sense the focus of this work is not on investigating child soldiers lives and experiences per se but on their presumed threatening feature as they depart from the protected territory of childhood disquieting everyday international life
