Deconstruction Reframed:

Deconstruction Reframed Floyd Merrell, 1985-12 A fascinating venture into diverse but contiguous and even overlapping worlds that points out unexpected relationships between modern linguistics textual analysis philosophy mathematics fiction physics and much else An illuminating radically interdisciplinary achievement Walter J Ong S J Philosophy **The Derrida Reader** Jacques Derrida, 1998-01-01 In the English speaking world Jacques Derrida's writings have most influenced the discipline of literary studies Yet what has emerged since the initial phase of Derrida's influence on the study of English literature classed under the rubric of deconstruction has often been disowned by Derrida What then can Derrida teach us about literary language about the rhetoric of literature and about questions concerning style form and structure The Derrida Reader draws together a number of Derrida's most interesting and idiosyncratic essays that treat literary language the idea of the literary and questions of poetics and poetry The essays discuss single tropes or concepts a figure such as metaphor the ideas of titles and signatures proper names and Derrida's thinking on such subjects as undecidability or aporia The editor's introduction is a demonstration in practice of how Derrida reads and how he adapts the act of reading to the text or figure in question The introduction also outlines each essay's main points its usefulness for reading literary texts and its particular area of interest The Derrida Reader thus provides students of literature with a focused contextualized and readily understandable volume Cybernetic Revelation J.D. Casten, 2012-11-20 Cybernetic Revelation explores the dual philosophical histories of deconstruction and artificial intelligence tracing the development of concepts like the logos and the notion of modeling the mind technologically from pre history to contemporary thinkers like Slavoj i ek Steven Pinker Bernard Stiegler and Daniel C Dennett The writing is clear and accessible throughout yet the text probes deeply into major philosophers seen by JD Casten as conceptual engineers Philosophers covered include Anaximander Heraclitus Parmenides Plato Aristotle Philo Augustine Shakespeare Descartes Spinoza Leibniz Locke Berkeley Hume Kant Hegel Nietzsche Freud Jung Joyce Dewey Wittgenstein Heidegger Adorno Benjamin Derrida Chomsky i ek Pinker Dennett Hofstadter Stiegler more with special chapters on AI's history Complexity Deconstructing AI Aesthetics Consciousness more Questions of the Liminal in the Fiction of Julio Cortazar Domenic Moran, 2017-12-02 The great Argentinian writer Julio Cortazar 1914-84 was immersed in one of the most vibrant and revolutionary intellectual scenes of the last century the Paris of the 1950s and 60s Yet his often highly cerebral work has never received the close philosophical attention it deserves Moran's book fills this critical lacuna Rather than indiscriminately applying theory to Cortazar it aims to show that his work both engages with and often foreshadows many of the problems which were to become central to so called poststructuralist philosophy and poetics This study demonstrates that Cortazar remains enduringly problematically modern Aesthetics and the Literature of Ideas François Jost, Melvin J. Friedman, 1990 This collection explores the aesthetic principles that pervade all sectors of human activities involving intellectual perceptiveness The three areas of investigation are aesthetics and rationality in the realm of

literary history and criticism the genres and meanings in the metamorphosis of the arts and aesthetics in literature society and politics

Derrida Christopher Norris,1987 Norris demonstrates that Derrida's texts should be understood more as philosophy than as literature He explains the position of Derrida's writing within the Western philosophical tradition and discusses some of the reasons for the massive institutional resistance that has so far prevented philosophers from engaging seriously with Derrida's work

Deconstructionism Joan Nordquist,1992 *Moments for Nothing* Gabriele Schwab,2023-10-24 Samuel Beckett's work has entranced generations of readers with its portrayal of the end times Beckett's characters are preoccupied with death and the specters of cataclysm and extinction overshadow their barren bleak worlds Yet somehow they endure experiencing surreal and often comic repetitions that seem at once to confront finitude and the infinite up to the limits of existence Gabriele Schwab draws on decades of close engagement with Beckett to explore how his work speaks to our current existential anxieties and fears Interweaving critical analysis with personal reflections she shows how Beckett's writing provides unexpected resources for making sense of personal and planetary catastrophes *Moments for Nothing* examines the ways Beckett's works have taken on new meaning in an era of crises climate change environmental devastation and the COVID 19 pandemic that are defined by both paralyzing stasis and pervasive uncertainty They also offer a bracing depiction of aging and the end of life exploring loneliness vulnerability and decay Beckett's particular vision of the apocalypse and his sense of persistence Schwab argues help us understand our times and even perhaps provide sanctuary and solace *Moments for Nothing* features insightful close readings of iconic works such as *Endgame* *Happy Days* and the trilogy as well as lesser known writings including the thirty five second play *Breath* which Schwab reconsiders in light of the pandemic

The Bible and Modern Literary Criticism Mark Powell,Cecile G. Sign, Textuality, World Floyd Merrell, 1992

Sign Textuality World is an explication of Charles Sanders Peirce in the context of current intellectual concerns including post structuralism science and the philosophy of science and various notions of textualism rhetoric and theories of fictionality Part I contrasts Peircean semiotics with Saussurean semiology while examining both in terms of the contemporary discourse in the philosophy of science logic and mathematics Part II uses key Peircean ideas in a general critique of three important texts Jean Francois Lyotard's The Postmodern Condition Christopher Norris's Contest of Faculties and Thomas Pavel's Fictional Worlds Part III is a brilliant investigation of the work of Group Mu in the light of the use of metaphors and models in Western thought with emphasis on the age old notion of language as a picture mirror model representing the world Peirce's signifying process semiosis is shown to be an enabling mediator and moderator in the construction of a pluralism of semiotically real worlds which rather than representing the real enjoys a greater or lesser degree of commensurability with it Thus Merrell emphasizes the relevance of Peirce's philosophy logic and cosmology all signs For him as for Peirce the idea of semiosis cannot be divorced from the pragmatics of concrete human interaction
