Proceedings of the 15th International Workshop on Deep-Inelastic Scattering and Related Subjects DIS, Günter Grindhammer, 2007 Proceedings of the 15th International Workshop on Deep-Inelastic Scattering and Related Subjects
Günter Grindhammer, 2007 Proceedings of the XXth International Workshop on Deep-Inelastic Scattering and Related Subjects Ian C. Brock, Deutsches Elektronen-Synchrotron (Hamburg), 2013 International Workshop on Deep Inelastic Scattering and Related Subjects, Eilat, Israel, 6-11 February 1994 Aharon Levy, 1994 **Charm Production in Deep Inelastic Scattering** Sebastian Klein, 2011-10-09 The production of heavy quarks in high energy experiments offers a rich field to study both experimentally and theoretically Due to the additional quark mass the description of these processes in the framework of perturbative QCD is much more demanding than it is for those involving only massless partons In the last two decades a large amount of precision data has been collected by the deep inelastic HERA experiment In order to make full use of these data a more precise theoretical description of charm quark production in deep inelastic scattering is needed This work deals with the first calculation of fixed moments of the NNLO heavy flavor corrections to the proton structure function F2 in the limit of a small charm quark mass The correct treatment of these terms will allow not only a more precise analysis of the HERA data but starting from there also a more precise determination of the parton distribution functions and the strong coupling constant which is an essential input for LHC physics The complexity of this calculation requires the application and development of technical and mathematical methods which are also explained here in detail **XVIII International Workshop on Deep-Inelastic Scattering and Related Subjects**, 2010 **Strangeness and Spin in Fundamental Physics** Mauro Anselmino, 2008 Presents discussion of the role played by two subtle and somehow puzzling quantum numbers the strangeness and the spin in fundamental physics Search for Supersymmetry in Hadronic Final States Hannsjörg Artur Weber, 2015-06-11 The project reported here was a search for new super symmetric particles in proton proton collisions at the LHC It has produced some of the world s best exclusion limits on such new particles Furthermore dedicated simulation studies and data analyses have also yielded essential input to the upgrade activities of the CMS collaboration both for the Phase 1 pixel detector upgrade and for the R D studies in pursuit of a Phase 2 end cap calorimeter upgrade **Twentieth International Workshop on Deep-Inelastic Scattering and Related Subjects** Ian C. Brock, 2013 **Index of Conference Proceedings** British Library. in the Chinese Japanese and Korean languages Listings are transcribed into Anglicised characters Each entry provides complete bibliographic information along with the NYPL and or LC call numbers **Twentieth International Workshop on Deep-Inelastic Scattering and Related Subjects, 26-30 March 2012, University of Bonn, Europe, Berlin ,2012**

Sixth International Conference on Perspectives in Hadronic Physics S. Boffi,2008-11-04 The aim of the Conference was to discuss recent results and perspectives on the theoretical and experimental investigation of the structure of free hadrons and hadrons in the nuclear medium as well as the structure of hadronic matter both at normal and extreme conditions The Volume is a useful update of the subject for theorists and experimentalists working in medium and high energy nuclear physics **Deep Inelastic Scattering: Dis 2006 - Proceedings Of The 14th International Workshop**

Masahiro Kuze,Kunihiro Nagano,Katsuo Tokushuku,2007-01-23 These proceedings present the most up to date status of deep inelastic scattering DIS physics Topics such as structure function measurements and phenomenology quantum chromodynamics QCD studies in DIS and photoproduction spin physics and diffractive interactions are reviewed in detail with emphasis on those studies that push the test of QCD and the Standard Model to the limits of their present range of validity towards both the very high and the very low four momentum transfers in lepton proton scattering *Strings and Symmetries* Gülen Aktas,1995-05-17 The topics in this volume constitute a fitting tribute by distinguished physicists and mathematicians They cover strings conformal field theories W and Virasoro algebras topological field theory quantum groups vertex and Hopf algebras and non commutative geometry The relatively long contributions are pedagogical in style and address students as well as scientists **The 9th International Workshop on Deep Inelastic Scattering, DIS 2001** G.

Bruni,Giuseppe Iacobucci,Rosario Nania,2002 Presents the most updated status of deep inelastic scattering DIS physics *Deep Inelastic Scattering - Proceedings Of The 8th International Workshop* John A Gracey,Tim J Greenshaw,2001-02-22 This volume focusses on four main topics structure functions tests of quantum chromodynamics physics at the highest Q² and p_T and high energy scattering and diffraction Comprehensive review articles on hadronic and photon structure lepton parton and parton parton physics as well as future experimental opportunities are presented together with a special lecture on HERA s legacy after the first decade of operation **Deep Inelastic Scattering** Masahiro Kuze,Kunihiro Nagano,Katsuo Tokushuku,2007 These proceedings present the most up to date status of deep inelastic scattering DIS physics Topics such as structure function measurements and phenomenology quantum chromodynamics QCD studies in DIS and photoproduction spin physics and diffractive interactions are reviewed in detail with emphasis on those studies that push the test of QCD and the Standard Model to the limits of their present range of validity towards both the very high and the very low four momentum transfers in leptonproton scattering
