They are helping people like you and hundreds of millions of others every day when something gets broken or when something doesn't work. However, their jobs are in danger and yours could be too. They could be largely replaced by computer automation. With the rapid growth of Artificial Intelligence capabilities, connected products, and virtual reality, we will see a change in the customer service industry in the upcoming decade that we haven't seen before. Moreover, in just about 30 years, computers may reach and quickly surpass the general human intelligence. And then what? As a result, companies will need to fundamentally change their approach to customer service in order to develop new revenue opportunities and strengthen market position. **Customer Service in the Transhuman Age** explores the development of transhumanism and how it could improve the way we do customer service. As you read these chapters, you'll explore the development of transhumanism and how it could improve the way we do customer service in the near future. **Practical guide for implementation** The book includes a practical set of strategies and tactics helping every organization to utilize currently available technologies for modernization and successful digital transformation of a contact center.
