Leveraging Knowledge for Innovation in Collaborative Networks Luis M. Camarinha-Matos, Iraklis Paraskakis, Hamideh Afsarmanesh, 2009-09-21 Collaborative Networks A Tool for Promoting Co creation and Innovation The collaborative networks paradigm offers powerful socio organizational mechanisms supported by advanced information and communication technologies for promoting innovation This in turn leads to new products and services growth of better customer relationships establishing better project and process management and building higher performing consortia By putting diverse entities that bring different perspectives competencies practices and cultures to work together collaborative networks develop the right environment for the emergence of new ideas and more efficient yet practical solutions This aspect is particularly important for small and medium enterprises which typically lack critical mass and can greatly benefit from participation in co innovation networks However larger organizations also benefit from the challenges and the diversity found in collaborative ecosystems In terms of research in addition to the trend identified in previous years toward a sounder consolidation of the theoretical foundation in this discipline there is now a direction of developments more focused on modeling and reasoning

about new collaboration patterns and their contribution to value creation. Soft issues including social capital, cultural aspects, ethics and value systems, trust, emotions, behavior, etc. continue to deserve particular attention in terms of modeling and reasoning. Exploitation of new application domains such as health care, education and active aging for retired professionals also help identify new research challenges both in terms of modeling and ICT support development. **The Joint**

Why do people behave the way they do? What causes different people to react differently to the same situation? Why are some Organisations more successful than others even though they appear to be managed in the same manner? All of these questions and more are the substance of what organisational behaviour is all about. Organisational behaviour (OB) is the systematic study of the actions and attitudes that people exhibit within organisations. It is individual behaviour and group dynamics in organisations. The study of organisational behaviour is primarily concerned with the psychosocial, interpersonal and behavioural dynamics in organisations. However, organisational variables that affect human behaviour at work are also relevant to the study of organisational behaviour. It is in this context a textbook on introduction to the subject of Organizational behavior is presented to the students of Management program. The book contains the syllabus from basics of the subjects going into the intricacies of the subjects. All the concepts have been explained with relevant examples and diagrams to make it interesting for the readers. An attempt is made here by the experts to assist the students by way of providing case based study material as per the curriculum with non commercial considerations. However it is implicit that these are exam oriented Study Material and students are advised to attend regular class room classes in the Institute and utilize reference books available in the library for In depth knowledge. We owe to many websites and their free contents we would like to specially acknowledge contents of website www.wikipedia.com and various authors whose writings formed the basis for this book. We acknowledge our thanks to them. At the end we would like to say that there is always a room for improvement in whatever we do. We would appreciate any suggestions regarding this study material from the readers so that the contents can be made more interesting and meaningful. Readers can email their queries and doubts to our authors on tmcnagpur@gmail.com. We shall be glad to help you immediately. Authors Dr Mukul Burghate and Dr Ninad Gawande.
