success     **Training to be a Primary School Teacher: ITT and Beyond** Megan Stephenson, Angela Gill, 2024-04-19 Your essential coursebook for primary initial teacher training Linked to the CCF and the ITTECF This complete handbook supports your accredited primary initial teacher training ITT course Covers all areas of core content outlined in the ITT Core Content Framework and the Initial Teacher Training and Early Career Framework Introduces key educational debates and a range of pedagogical perspectives on teaching and learning Includes reflection activities to empower you to take control of your own learning and deepen your understanding Supports your understanding of how the academic aspects of your ITT course link with your school based experience Provides you with opportunities to apply your knowledge in context Enhances your understanding of what is required of you during ITT ensuring you get the most out of your course     *Classroom Connect Newsletter* ,2000     *Library + Information Update* ,2004     **Teaching with Technology** Priscilla Norton, Karin M. Wiburg, 2003 The distinctive characteristic of TEACHING WITH TECHNOLOGY Second Edition is its clear correlation between theory and practice This text focuses on ways to use technology to foster learning in K 12 classrooms instead of presenting the mechanics of computer operation Norton and Wiburg s chapters are not based on computer applications they are based instead on how technology can support student acquisition of literacy content knowledge problem solving participating in communities and student utilization of information and systems of assessment     Using the Internet for Active Teaching and Learning Steven C. Mills, 2006 For courses in Computers in Education Are you ready to make use of the power of the Internet to support your teaching Using the Internet for Active Teaching and Learning combines both theory and practice to introduce you to the Internet s potential as a teaching tool in your classroom With student learning as its goal the book is organized by its functions in the classroom from communication to locating and evaluating information publishing information information problem solving cooperative problem solving inquiry and discovery and online collaborations

**Handbook of Online Learning** Kjell Erik Rudestam, Judith Schoenholtz-Read, 2002-02-19 I found the book excellent and read every one of the 450 pages Many of the chapters reflect the Fielding Institute s focus on human and organizational behaviour educational leadership and organizational management The book will be particularly appropriate for readers from a corporate training or business school background though there is much for academics and online educators at all levels and subject areas to learn from this well crafted book There are many books and articles about online learning This is one of the better ones Robin Mason Computers and Education Technology mediated instruction has taken the university and the corporate sector by storm As more instructors teach online for a dispersed learning community in both academic and business environments there s a need for resources that will help them adapt to this new teaching method Educators who come out of traditional academic institutions tend to use traditional methods when offering courses online e g lectures textbooks and readings examinations rather than attend to small group processes and principles of what the editors of this volume call andragogy This Handbook goes beyond the mechanics of how to create and direct an online learning experience

to consider such a new approach to pedagogy in doing so The editors primary purpose is to clarify the conceptual issues that underlie effective online teaching and to offer practical guidance to educators and corporate trainers who plan to teach in a virtual environment Their central tenet is the adoption of computer networks as the teaching vehicle of the future demands a re examination of our core beliefs about pedagogy and how students learn The transfer of a classroom curriculum into cyberspace is deceptively simple but doing so without an appreciation of the nuances and implications of learning online ignores not only the potential of this medium but the inevitable realities of entering it Rather than fear the challenges that new technology brings to systems of learning the editors hope to help instructors embrace it by re thinking how knowledge is acquired and how educational processes may be optimally designed in a new age of teaching and learning Features Benefits Part I provides an overview and includes discussion of the unique structural aspects of the electronic learning environment pedagogical issues curriculum design psychological and group dynamics and ethical issues Part II examines practical issues associated with implementing courses online both in the traditional university setting and in professional corporate training environments The book draws heavily on personal case examples many from The Fielding Graduate Institute s 26 years of teaching in nontraditional distributed learning environments *The Virtual Canyon Teachers* Cara Stoneburner, 1998
