Digital Age Advertising Management Gopee Shukla, 2025-01-03 Digital Age Advertising Management explores how technology revolutionizes the way we advertise products and services online. Covering everything from websites to social media, this book delves into the essentials of digital advertising in the 21st century. We comprehensively cover topics related to digital advertising, SEO, and local advertising. This book aims to equip you with the knowledge to develop effective marketing strategies for any business. Today, advertising leverages Artificial Intelligence, Blockchain, and data analytics, making organizational strategies more competitive. Even if you're not directly involved in advertising, understanding its dynamics is crucial. This book helps you grasp the world of advertising, providing insights into online advertising at local, national, and international levels.

Process Engineering Michael Kleiber, 2023-11-20 Reading the book, you can feel the long practical experience of the author. The text is easy to read, even where concepts can be complex. The strong theoretical background of the author is well known from other publications. In this book, however, the topics are presented on a level that every engineer and scientist in the chemical industry and process industry should know and can understand. This book would have been very helpful at the beginning of my career to close the addressed gap. Therefore, I can strongly recommend it not only to all students close to their degree but also to engineers and scientists just starting their industrial career in the related industrial sectors that are subsumed under the term process industry: chemical or petrochemical industry, pharmaceutical industry, food industry, biochemical industry, environmental technology, etc. The book is like an investment. Doing a better job and getting a better job evaluation might pay for the book. Prof. Dr. Ing. Claus Fleischer, Frankfurt University of Applied Sciences. Process Engineering is based on almost 30 years of practical experience of the author in process simulation, design, and development. The book is a missing link between students and practitioners. The author has coached many graduates in their first months and knows what the typical questions are. Coming from the university, graduates often do not know which relevance their knowledge has and how to apply it in real life, whereas established practitioners often stick to the narrow way of their experience, forgetting that science continuously makes progress. There is a gap to be bridged. From his own professional experience, the author covers many topics of the process engineering business, but three guest contributions are a valuable supplement to the content of the third edition. Already in the 2nd edition, Verena Haas from BASF SE wrote an excellent chapter on dynamic process simulation. For the new 3rd edition, G. K. Adali and Michael Benje added two chapters on digitalization and patents, respectively. Preparing the reader for the everyday business.

[The Routledge Handbook on Radicalisation and Countering Radicalisation](#) Joel Busher, Leena Malkki, Sarah Marsden, 2023-11-28 This handbook provides a theoretical and methodological exploration of the research on radicalisation and counter radicalisation, one of the most influential concepts in Security Studies, International Relations, and Peace and Conflict Studies. Sitting at the heart of high profile research and policy agendas on preventing and countering violent extremism, P-CVE radicalisation as a concept has

transformed the way researchers policymakers and societies think about how to counter terrorism and political violence Deliberations about radicalisation and countering radicalisation have become further embedded as efforts to prevent and counter violent extremism have been mainstreamed into other areas of public policy and practice such as education gender relations health peacebuilding aid and development Theoretically and methodologically pluralistic this handbook addresses radicalisation and countering radicalisation as they relate to a wide range of groups and milieus articulating diverse ideological positions drawing together insight and experience from multiple geographic and institutional settings integrating global perspectives and including scholarship focused on a range of policy fields This book will be an essential reference point for anybody working on radicalisation countering radicalisation or terrorism and political violence more broadly The insight that it provides will be relevant for both academics and members of relevant policy and practitioner communities
