**Implementing Personalized Learning Techniques with AI** Posavec, Kristina, 2025-01-03 Artificial intelligence is reshaping the educational landscape by enabling more personalized, efficient and inclusive learning experiences. AI tools help educators address challenges like large class sizes and diverse student needs by automating administrative tasks and tailoring content to individual learners. This shift has the potential to close educational gaps, enhance student engagement and improve overall outcomes. As AI continues to evolve, its integration into classrooms could redefine how knowledge is delivered and accessed, fostering more equitable and adaptive learning environments. **Implementing Personalized Learning Techniques with AI** explores how AI can redefine educational practices and enhance the learning experience for both teachers and students. It further delves into the multidimensional role of AI in education, from automating routine tasks to providing personalized learning experiences according to the student's abilities, skills and needs. Covering topics such as accessible education, student motivation and vocational school learning environments, this book is an excellent resource for educators, school administrators, education policymakers, instructional designers, edtech developers, academic researchers and more.

**Digital Competence Development in Early Childhood Professionals** Sarika Kewalramani, Weipeng Yang, Maria Dardanou, Maria Hatzigianni, 2025-12-04 This book examines innovative recent developments in curricula and pedagogical discourses around early childhood professionals' digital competence development via professional development avenues. By expanding the notion of digital technologies integration, teaching perspectives and educators' practices in early childhood education, the authors not only conceptualise a professional development model but also apply the model to bring together research across cultural contexts. Presenting findings from four cases, it offers research-informed, tangible examples of teacher-centric professional development, one that inspires early childhood professionals, teacher educators and pre-service teachers to use a variety of multimodal technologies within their repertoire of play-based practices, e.g. STEM-focused play for and with young children, teaching computational thinking. Case studies in this book are evidence of how practitioners can come together to build communities of practice to support their digital competence development as critical pedagogues and integrate a variety of

evolving technology based play e.g AI platforms while engaging in paradigmatic debates Readers will better appreciate the growth in pragmatic applications of technologies together with theoretical perspectives and methodological approaches This will be a valuable resource for any academic or practitioner whether beginning or expert in understanding how digital competence development occurs through cultural learnings is inclusive not discipline based is holistic In reframing early childhood professionals digital competence development as a naturalistic process it will inspire educators to integrate a range of digital and multimodal technologies in their everyday practices
