Writing and Editing for Digital Media Brian Carroll, 2025-12-12 An essential guide to writing and editing for digital media this sixth edition responds to the mainstreaming of genAI Generative AI and LLMs Large Language Models among many other changes in the best practices of digital storytelling Carroll explains and demonstrates how to effectively write for digital spaces and places that typically abound with graphical content multimedia and hypertextual interactive elements He also combines hands on practical exercises with information on key topics such as misinformation and disinformation and the proliferation of artificial intelligence This new edition specifically explores the ethical questions raised by AI as well as the new possibilities it presents Each chapter features lessons and exercises through which students can build a solid understanding of the ways that digital communication provides opportunities for dynamic storytelling and multi directional communication It also speaks to writers editors public relations practitioners and social media managers and marketers Updated with contemporary examples and new pedagogy throughout this is the ideal handbook for students seeking careers in digital media particularly in content development and digital storytelling It is an essential text for students of media communication public relations marketing and journalism who are looking to develop their writing and editing skills for these ever evolving fields and professions This book also has accompanying Support Material that offers additional weekly activities and assignments providing students additional opportunity to put theory into practice [New Perspectives on the Ontology of Social Identities](#) Alejandro Arango, Adam Burgos, 2024-06-03 This volume presents new research in social ontology by focusing on questions related to the characteristics categories and conceptual methodologies surrounding social identities in general and specific social identities in particular The volume contains eight original essays plus a foreword written by Linda Martin Alcoff that engage with issues pertaining to a broad range of identities including class sexuality gender race ethnicity and religious identity This collection is an abrebocas an entry way to theorizing about social identities in novel ways and the essays collected here point to specific modes of understanding and experiencing social identities that have not been given their due or that offer new approaches to well worn topics New Perspectives on the Ontology of Social Identities will appeal to scholars and advanced students across several philosophical disciplines such as philosophy of race feminist philosophy social and political philosophy phenomenology epistemology and social ontology Scholars in disciplines like psychology religious studies and other social sciences will also find new approaches to questions of social identity relevant to understanding the complexity of the social world **Emotions Online** Alan Petersen, 2022-12-30 Digital media have become deeply immersed in our lives heightening both hopes and fears of their affordances While the internet mobile phones and social media offer their users many options they also engender concerns about their manipulations and intrusions Emotions Online explores the visions that shape responses to media and the emotional regimes that govern people s engagements with them This book critically examines evidence on the role of digital media in emotional life Offering a

sociological perspective and using ideas from science and technology studies and media studies it explores The dimensions and operations of the online emotional economy Growing concerns about online harms and abuse especially to children Deepfakes and other forms of image based abuse The role of hope in shaping online behaviours Digital well being and its market COVID 19 s impacts on perceptions of digital media and Big Tech Growing challenges to centralised control of the internet and the implications for future emotional life The book breaks new ground in the sociological study of digital media and the emotions It reveals the dynamics of online emotional regimes showing how deceptive designs and algorithm driven technologies serve to attract and engage users As it argues digital media rely on the emotional labours of many people including social media influencers and content moderators who make the internet seem smart The book provides an invaluable overview of the evidence and debates on the role of digital media in emotional life and guidance for future research policy and action

Gendered Nature of Social Media Networks Usha Rana,Rupender Singh,2025-10-14 There is a complicated interplay between gender dynamics and technology in the digital age especially through social media Combining the knowledge of seasoned professionals and academics from around the world this new book investigates the complex and multifaceted relationship between gender and social media providing an interdisciplinary and international viewpoint on the subject Each chapter of the book presents a distinctive viewpoint on the interaction between gender and social media The book first provides a summary of the theoretical foundations and then delves into how social media platforms mediate and reflect societal constructs of gender and how those assumptions shape online experiences The book also discusses how gender representation on social media platforms may either challenge conventional standards or reinforce stereotypes The book observes how social media contributes to activism and social change discussing how it has been used by feminist movements LGBTQ activism and diverse programs to address gender inequality The book goes into further detail about these platforms darker sides including issues that include cyberbullying harassment and privacy worries that disproportionately affect women and other underrepresented groups

Adolescent Use of New Media and Internet Technologies Gordon P. D. Ingram,2023-03-31 This book engages with contemporary and often polarizing debates surrounding the risks of adolescent use of digital media and internet technologies By drawing on multiple research studies the text synthesizes current understandings of the impacts of social network use online gaming pornography and phenomena including cyberbullying cyberstalking and internet addiction to develop recommendations for the effective identification of at risk youth as well as strategies for informed communication about online risks and opportunities It shows how media discussion of risks to children and teenagers from new technology is highly emotive and often exaggerated rooted in the moral panic surrounding new cultural practices that young people engage in but which adults do not understand Online risks are thus conceptualized as centering on three areas specific to adolescence which have undergone radical changes due to new internet technology These include young people s identity the types of content that are accessed and social relationships

The author shows how these matters stem from the potential of new technology to establish new interpersonal connections emphasizing how it brings opportunities as much as risks. As such, he provides a uniquely balanced discussion of potential dangers while also emphasizing the opportunities for social, academic, and personal growth which new technologies afford young people. It will be indispensable for researchers and clinicians interested in assessing levels of online risk, as well as scholars and educators with interests in cyberpsychology, social psychology, cyber culture, social aspects of computing and media, and adolescent development.
