Debating Human Rights In China:

Debating Human Rights in China Marina Svensson, 2002-05-14 Tracing the concept of human rights in Chinese political discourse since the late Qing dynasty this comprehensive history convincingly demonstrates that contrary to conventional wisdom there has been a vibrant debate on human rights throughout the twentieth century Drawing on little known sources Marina Svensson argues that the concept of human rights was invoked by the Chinese people well before the adoption of the Universal Declaration of Human Rights in 1948 and that it has continued to have strong appeal after 1949 both in Taiwan and on the mainland These largely forgotten debates provide important perspectives on and contrasts to the official PRC line The author gives particular attention to the issues of power and agency in describing the widely divergent views of official spokespersons establishment intellectuals and dissidents Until quite recently the PRC dismissed human rights as a bourgeois slogan Yet the globalization of human rights and the growing importance of the issue in bilateral and multilateral relations have forced the regime to embrace or rather appropriate the language of human rights an appropriation that continues to be vigorously challenged by dissidents at home and abroad By exploring the relationship between domestic and international human rights discourses this study offers new insights not only into the Chinese but also into the Western human rights debate Students and scholars of China and of human rights will find this work an important tool for understanding one of the great issues of our time *Debating Human Rights* Daniel P. L. Chong, 2014 Even as human rights provide the most widely shared moral language of our time they also spark highly contested debates among scholars and policymakers When should states protect human rights Does the global war on terror necessitate the violation of some rights Are food housing and health care valid human rights *Debating Human Rights* introduces the theory and practice of international human rights by examining fourteen controversies in the field Daniel Chong presents the major arguments on both sides of each debate encouraging readers to think critically and form their own opinions Designed for classroom use the structure of the book makes it easy for students to become familiar with the major political and legal actors in the global human rights system and to understand the practical challenges of protecting civil political social and economic rights **International Engagement in China's Human Rights** Titus Chen, Dingding Chen, 2015-07-03 Since the Tiananmen Square incident in 1989 there has been increasing international pressure on China to improve its approach to human rights whilst at the same time the Chinese government has itself realised that it needs to improve its approach and has indeed done much to implement improvements This book explores systematically the international engagement in human rights in China and assesses the impact of such foreign involvement It looks at particular areas including criminal justice labour and religious freedom considers the processes by which international pressure is brought to bear and the processes by which improvements are implemented in China and concludes that whilst China's human rights record has improved more than many people realise further improvements are still needed **China and International Human Rights** Na

Jiang,2013-12-12 This book is designed to introduce law students legal actors and human rights activists particularly participants in human rights dialogues with China to the process and reality of a newly confident China's participation in the international human rights system albeit with inherent challenges From an international and comparative perspective one of the key findings of the author's research is that progress towards human rights depends more on judges than on legislators Chinese legislators have enacted a series of reforms in order to better protect human rights Unfortunately these reforms have not led to greater adherence to China's international human rights obligations in practice The reforms failed because they have generally been misunderstood by Chinese judges who often have a limited understanding of international human rights norms Specifically this book will examine how judicial misunderstandings have blocked reforms in one specific area the use of severe punishments based on international human rights theory and case studies and data analyses This examination has several purposes The first is to suggest that China ratify the ICCPR as the next step for its substantive progress in human rights and as a good preparation for its re applying to be a member of the UN Human Right Council in the future The second is to explain how judges could be better educated in international human rights norms so as to greatly reduce the use of severe punishments and better comply with China's human rights obligations The third is to demonstrate how the international community could better engage with China in a manner that is more conducive to human rights improvements The author's ultimate goal is to enhance dialogue on human rights in China between judges and the Chinese government between Chinese judges and their foreign counterparts and between China's government and the international community Another significant aim of this book is to clarify the controversial question of what obligations China should undertake before its ratification of the ICCPR and to re examine trends in its developing human rights policy after standing down from the Council in late 2012 The tortuous progress of China's criminal law and criminal justice reforms has confirmed that Chinese judges need further instruction on how to apply severe punishments in a manner consistent with international standards Judges should be encouraged to exercise more discretion when sentencing so that penalties reflect the intent of relevant domestic laws as well as the international human rights standards enumerated in the ICCPR In order to better educate and train judges this book contains introductory chapters that examine the severe punishments currently available to Chinese judges from an international human rights perspective To illustrate how Chinese justice currently falls short of international norms this paper also examines several cases that are considered to be indicative of China's progress towards greater respect for human rights and the rule of law These cases demonstrate that China still has a long way to go to achieve its goals at least before abolishing the death penalty forced labor and torture Challenges and Policy Programmes of China's New Leadership Joseph Y. S. CHENG,2007-04-01 This volume analyzes the new leadership's perceptions of the challenges facing it how it defines its priorities builds up political support for its policy programmes and overcomes the resistance of vested interests Attempts will also be made to evaluate its achievements so far Published by City University of
