Trustworthy Communications and Complete Genealogies Reagan W. Moore, 2022-06-01 Genealogies document relationships between persons involved in historical events Information about the events is parsed from communications from the past This book explores a way to organize information from multiple communications into a trustworthy representation of a genealogical history of the modern world The approach defines metrics for evaluating the consistency correctness closure connectivity completeness and coherence of a genealogy The metrics are evaluated using a 312 000 person research genealogy that explores the common ancestors of the royal families of Europe A major result is that completeness is defined by a genealogy symmetry property driven by two exponential processes the doubling of the number of potential ancestors each generation and the rapid growth of lineage coalescence when the number of potential ancestors exceeds the available population A genealogy expands from an initial root person to a large number of lineages which then coalesce into a small number of progenitors Using the research genealogy candidate progenitors for persons of Western European descent are identified A unifying ancestry is defined to which historically notable persons can be linked *Centuries of Tutoring* Edward E. Gordon, Elaine H. Gordon, 1990-04-09 This book examines both the development of tutoring as a form of education and its influence on schooling It offers a review of what past educators wrote on their work the lives of their students and the wider socio cultural ramifications during centuries of tutoring The role of the tutor and the tutor governess is reviewed as education at home and the corollary use of tutors in the school The nineteenth century in Europe and America witnessed the widespread use of tutors and the gradual adoption of mandatory tax supported public schooling The study concludes with a brief review of the contemporary uses of tutoring and an analysis of its historical contributions to Western education
