Discovering the Deccan: a Panoramic Journey Through Historic Landscapes and Monuments George Michell, Helen Philon, 2015-05-30 The Deccan region of peninsular India remains one of India's best kept secrets in spite of its numerous impressive historical monument the rock cut Buddhist shrines at Karla and Ajanta the elegant carvings on the Hindu temples at Badami and Aihole the magnificent ruins of the imperial city of Hampi Vijayanagara the imposing forts and tombs at Gulbarga Bidar Bijapur and Golconda the elegant European influenced palaces in Hyderabad These and other monuments survive in a comparatively complete condition but have until now been underappreciated Deccan Heritage Foundation *Discovering the Deccan* is published in association with the Deccan Heritage Foundation DHF newly founded in the UK and India to promote awareness of the cultural heritage within the living social context and surviving natural environment of the region Too many of the sites showcased in this volume remain little known outside peninsular India They are now threatened with neglect and even worse misguided urban development and insensitive archeological restoration The brilliant visual impact of the photographs is intended to draw attention to these and other

problems of preserving this unique heritage and to promote the efforts of the DHF in areas of research education and hopefully in time restoration

Jaina Culture in Medieval Karnataka Julia A.B. Hegewald,2025-04-21 Why did the Jainas in Karnataka plunge from a position of supremacy into one of severe dependency After a steep and steady rise throughout the region from about the fifth century CE Jaina influence waned dramatically from the late eleventh or early twelfth centuries onwards In this publication specialists in Indian history religious studies and anthropology as well as historians of art and architecture discuss various expressions of this sudden and detrimental decline and explore the reasons for it focusing in particular on the relations of the Jainas with V ra aivas and Muslims The evidence provided by the five international scholars who offer insights from different disciplinal backgrounds indicates that the reasons for the Jainas loss of authority in the region were manifold Certain internal triggers such as changes in Jaina social structure and religious practices adversely affected their position over time In particular however the withdrawal of royal patronage the success of the V ra aivas as traders and the emergence in the area at this time of a number of competing religious groups caused the Jainas to slip into a position of strong asymmetrical dependency

Ecological Interdependencies Zeynep Y. Gökçe,Jennifer Leetsch,2025-11-17 This volume interrogates the environmental humanities through the lens of asymmetrical dependencies it is interested in investigating the relationship between the environment and asymmetrical power dynamics an approach that sheds light on how historical and contemporary inequalities have shaped and still shape our social political and cultural realities as they intersect with their respective ecosystems In an attempt to bridge disciplines the volume synthesizes diverse perspectives from the humanities and social sciences anthropology art history cultural studies archaeology religious studies political science and literary studies attending to the tangled and often thorny relationships that form human and more than human existence By incorporating ecological viewpoints and recognizing the agency of non human actors the book aims to amplify the often overlooked voices of the marginalized including those beyond the human realm Understanding the intersections of power dynamics and human history requires acknowledging our deeply interconnected existence within a broader planetary context and this edited volume s contributions offer a lens through which to rethink enduring questions of difference and dependency These considerations are framed not as abstract or theoretical exercises but as deeply grounded in material realities shaped by histories of asymmetry inequality and exploitation thus challenging us to critically reframe notions of ecological inter dependencies beyond the universalizing narratives of the Anthropocene
