## Decent Intentions:

**Good Intentions—Bad Consequences** Phillip Nelson, 2017-03-24 A new approach to understanding voter choice with important implications There is a substantial class of voters who would like to do good but ignore important consequences of their attempts to do so naïve altruists The book both shows why such a class exists and tests the implications of that group's behavior in a setting where other voters are self-interested others are traditionalists and imitation plays a big role in voter choice The book also looks at the policy implications of such behavior accepting as desirable but not fully achievable the democratic ideal in which sufficiently informed citizens are given equal weight in political choices Naïve altruists ignore the anti-growth consequences of redistribution from the rich as a class to the poor as a class That ignorance produces too much of that redistribution in terms of the democratic ideal

**The Argument of Supererogation and the Limits of Duty in Applied Ethics** Marie-Luise Raters, 2025-09-30 Drawing on current research this book demonstrates that there are rational reasons for why certain actions should reasonably not be considered duties despite their moral value Would you do something unpleasant or dangerous you are not obliged to simply because it would benefit others I won't do this because I don't have to This argument of supererogation can be used to reject overly demanding moral expectations Yet the argument is not always equally convincing For instance refusing to donate a kidney is morally accepted Refusing a favor to a friend however seems indecent Perhaps supererogatory acts do not exist at all This book offers a refined framework for understanding the boundaries of moral duty It is of interest to students and scholars of moral philosophy applied ethics and meta-ethics Public Service Magazine, 1926 Judy's annual, ed. by C.H. researcher report from the front lines of a revolution in solving the world's most persistent problem When it comes to global poverty people are passionate and polarized At one extreme We just need to invest more resources At the other We've thrown billions down a sinkhole over the last fifty years and accomplished almost nothing Dean Karlan and Jacob Appel present an entirely new approach that blazes an optimistic and realistic trail between these two extremes In this pioneering

book Karlan and Appel combine behavioral economics with worldwide field research They take readers with them into villages across Africa India South America and the Philippines where economic theory collides with real life They show how small changes in banking insurance health care and other development initiatives that take into account human irrationality can drastically improve the well being of poor people everywhere We in the developed world have found ways to make our own lives profoundly better We use new tools to spend smarter save more eat better and lead lives more like the ones we imagine These tools can do the same for the impoverished Karlan and Appel s research and those of some close colleagues show exactly how In America alone individual donors contribute over two hundred billion to charity annually three times as much as corporations foundations and bequests combined This book provides a new way to understand what really works to reduce poverty in so doing it reveals how to better invest those billions and begin transforming the well being of the world
