## **Deception On All Accounts:**

Deception on All Accounts Sara Sue Hoklotubbe, 2013-11-01 Is murder always a simple transaction Don't bank on it Sadie Walela's life is about to be turned upside down One morning Sadie unlocks the door at the Mercury Savings Bank and confronts a robber who's been lying in wait for her and her fellow employees He flees after stealing money and killing her coworker When a whirlwind of events leaves Sadie herself under suspicion she sets out to clear her name This banker turned sleuth is suddenly plunged into an unfamiliar world in which people are not always as they appear not her employer not the homeless man she's befriended not the police officer who takes an interest in the case not the man she falls in love with And as she's beginning to imagine not even herself Sadie is a blue-eyed Cherokee living in northeastern Oklahoma a half-blood who finds she sometimes has to adapt to get by in the white man's world much as her father's ancestors did In this story of robbery murder love and intrigue she faces adversity at each bend in the road but in the tradition of her people she adapts and moves forward even if it means having to re-think her relationships and expectations Set against the backdrop of small town Oklahoma and its Native culture *Deception on All Accounts* draws readers into the real lives of contemporary American Indians as it shines a light on violence corporate corruption and prejudice in modern America As Sadie Walela comes to terms with murder romance and her hopes for a career she finds deception on all accounts **Deception's Legacy**

Jacqueline G. Randolph, 2007-09 Combining three intersecting time lines from 1966 and 2030 the focus of *Deception's Legacy* is Andaluc a Spain where multiple religions lived in relative peace until the bloody Spanish Inquisition **Self-Deception's**

**Puzzles and Processes** Jason Kido Lopez, 2016-08-16 The contemporary literature on self-deception was born out of Jean Paul Sartre's work on bad faith lying to oneself As time has progressed the conception of self-deception has moved further and further away from Sartre's conception of bad faith In *Self-Deception's Puzzles and Processes A Return to a Sartrean View* Jason Kido Lopez argues that this departure is a mistake and that we should return to thinking about self-deception in a Sartrean fashion in which we are self-deceived when we intentionally use the strategies and methods of interpersonal deception on ourselves Since literally tricking ourselves cannot work we will always see through our own self-deception after all self-deception merely consists of the attempt to trick ourselves in this way Other scholars have rejected this notion of self-deception historically dismissing it as paradoxical Lopez argues first that it isn't paradoxical and he further suggests that moving away from this notion of self-deception has caused the contemporary literature on the topic to be littered with disparate and conflicting theories Indeed there are a great many ways to avoid the allegedly paradoxical Sartrean notion of self-deception and the resulting plethora of accounts lead to a fragmented picture of self-deception If however the Sartrean view isn't paradoxical then there was no need for the host of contradictory theories and most researchers on self-deception have missed what was originally so intriguing about self-deception that it like bad faith is the process of literally trying to trick oneself into believing what is false or unwarranted *Self-Deception's Puzzles and Processes* will be of great interest to

students and scholars of epistemology philosophy of mind psychology and continental philosophy and to anyone else interested in the problems of self deception

**Moral Appraisability** Ishtiyaque Haji, 1998-02-26 This book explores a central question of moral philosophy addressing whether we are morally responsible for certain kinds of actions intentional omissions and the consequences deriving therefrom Haji distinguishes between moral responsibility and a more restrictive category moral appraisability To say that a person is appraisable for an action is to say that he or she is deserving either of praise or blame for that action One of Haji's principal aims is to uncover conditions sufficient for appraisability of actions He begins with a number of puzzles that serve to structure and organize the issues each one of which motivates a condition required for appraisability The core of Haji's analysis involves his examination of three primary types of conditions According to a control condition a person must control the action in an appropriate way in order to be appraisable An autonomy condition permits moral appraisability for an action only if it ultimately derives from a person's authentic evaluative scheme On Haji's epistemic requirement moral praiseworthiness or blameworthiness demands belief on the part of the agent in the rightness or wrongness of an action Haji concludes this portion of his argument by incorporating these conditions into a general principle which outlines sufficient conditions for appraisability Haji offers a fascinating discussion of the implications of his analysis He demonstrates that his appraisability concept is applicable to a variety of non moral kinds of appraisal such as those involving legal prudential and etiquette considerations He looks at crosscultural attributions of blameworthiness and argues that such attributions are frequently mistaken He considers the case of addicts and suggests that they may not be morally responsible for actions their addictions are said to cause He even takes up the intriguing question of whether we can be blamed for the thoughts of our dream selves Engaging with a central metaphysical question in his conclusion Haji argues that the conditions of moral responsibility he defends are neither undermined by determinism nor threatened by certain varieties of incompatibilism Addressing a range of little discussed topics and forging crucial connections between moral theory and moral responsibility Moral Appraisability is vital reading for students and scholars of moral philosophy metaphysics and the philosophy of law

**Experiments in Anti-Social Behaviour** David Canter, 2020-11-17 For a practical hands on approach to learning forensic psychology Experiments in Anti Social Behaviour Ten Studies for Students presents a collection of unique projects for students that illustrate the many ways research into anti social behaviour can be conducted whilst also highlighting social psychological aspects of criminality Drawing on over half a century of supervising many hundreds of projects at high school undergraduate master's and doctoral levels David Canter provides well grounded and detailed guidance for students on how to execute a range of different research studies through several psychological approaches including quantitative cognitive studies qualitative discourse analysis and social identity theory After introducing the ethical and practical challenges of studying crime and criminality Experiments in Anti Social Behaviour outlines broad approaches to research This is followed by ten practical studies for students to carry out in order to engage directly with

experimental research These studies cover experiments surveys and case studies and include a controlled examination of how easy it is to forge a signature descriptions of experiments trying to detect deception and an exploration of what is involved in linking actions in a serial killer s crimes to his characteristics Both engaging and interactive Experiments in Anti Social Behaviour is an invaluable resource for instructors and students from colleges and universities around the world in many different fields such as psychology criminology and socio legal studies It will also be of interest to all those who want to know more about the psychology of crime and criminality
