## **Decision Support Systems In Critical Care:**

*Decision Support Systems in Critical Care* M. Michael Shabot, Reed M. Gardner, 2012-12-06 Modern critical care is characterized by the collection of large volumes of data and the making of urgent patient care decisions. The two do not necessarily go together easily. For many years the hope has been that ICU data management systems could play a meaningful role in ICU decision support. These hopes now have a basis in fact and this book details the history, methodology, current status and future prospects for critical care decision support systems. By focusing on real and operational systems, the book demonstrates the importance of integrating data from diverse clinical data sources, the keys to implementing clinically usable systems, the pitfalls to avoid in implementation and the development of effective evaluation methods. **Decision Support**

James Murray, 2002 This authoritative reference published under the auspices of the American Society of Critical Care Anesthesiologists (ASCCA) is now in its Second Edition. More than 100 internationally recognized experts present state-of-the-art strategies for successful, cost-effective perioperative care and management of acutely ill patients. This thoroughly revised edition features many distinguished new contributors from anesthesiology, critical care medicine, internal medicine, surgery and pediatrics. Timely new chapters cover medical informatics, evidence-based medicine, human genomics, research in critical care medicine and imaging in the ICU. Chapters on acute respiratory distress syndrome, sepsis and other diseases have been rewritten to reflect recent technological and therapeutic breakthroughs. **Efficient Decision Support Systems** Chiang

Jao, 2011-09-06 This series is directed to diverse managerial professionals who are leading the transformation of individual domains by using expert information and domain knowledge to drive decision support systems (DSSs). The series offers a broad range of subjects addressed in specific areas such as health care, business management, banking, agriculture, environmental improvement, natural resource and spatial management, aviation administration and hybrid applications of information technology aimed at interdisciplinary issues. This book series is composed of three volumes. Volume 1 consists of general concepts and methodology of DSSs. Volume 2 consists of applications of DSSs in the biomedical domain. Volume 3 consists of hybrid applications of DSSs in multidisciplinary domains. The book is shaped by decision support strategies in the new infrastructure that assists the readers in full use of the creative technology to manipulate input data and to transform

information into useful decisions for decision makers
