

Review caries

Caries presenting as hard lesions can be left in situ and monitored

It may be possible to leave caries-infected soft dentine, if a peripheral enamel/ filling seal is achievable

SDA

Assuming health can be restored to IO anterior occluding teeth (SDA concept) the molars do not need replacing for oral health and comfort

If the lower canines and premolars can be replaced (e.g. with implants), the mandibular molars do not need to be replaced for the SDA concept

Reposition teeth to...

Create space for prosthetic unit

Close diastema

Create space for restorations by intrusion

Upright roots to create space for implants

Decision Making In Dental Treatment Planning

Decision Making In Dental Treatment Planning:

Decision Making in Dental Treatment Planning Walter B. Hall, 1994 Decision-Making in Dental Treatment Planning
Bich Hue Lang-Hua, 2017-01-26 This dissertation Decision making in Dental Treatment Planning to Maintain or to Extract Compromised Teeth by Bich Hue Lang Hua was obtained from The University of Hong Kong Pokfulam Hong Kong and is being sold pursuant to Creative Commons Attribution 3.0 Hong Kong License The content of this dissertation has not been altered in any way We have altered the formatting in order to facilitate the ease of printing and reading of the dissertation All rights not granted by the above license are retained by the author Abstract Background A number of systematic reviews provide the basis for decision making in treatment planning of the reconstruction of mutilated dentitions This includes identifying teeth difficult to treat save and decisions on replacement such teeth if extracted Aims 1 To assess attitudes of general dental practitioners GDPs in a community where provision of dental implants is a widely practiced treatment and to determine variations in attitudes with respect to dentists factors training factors and implant provision factors Study 1 and 2 To determine treatment decision making with respect to maintaining periodontally compromised teeth among dentists with and without postgraduate qualifications in implant dentistry Study 2 Methods Study 1 A cross sectional survey was conducted on a random sample of registered dentists in Hong Kong regarding their attitudes towards implant dentistry with respect to 1 perceived superiority 2 perceived outcomes 3 perceived complications and maintenance issues and 4 placement issues In addition information was collected on dentists factors training factors and implant provision factors Variations in attitudes towards implant dentistry were explored Study 2 A series of patient scenarios with varying degrees of periodontal disease levels was presented to selected dentists Information on their decision making outcomes and their intention to retain compromised teeth was analysed in bivariate and regression analyses accounting for postgraduate implant training gender years in dental practice and implant placement experience Results Study 1 Among eligible practitioners n 246 the response rate was 46.3% Most dentists perceived implants to be superior to conventional prostheses for the replacement of a single missing posterior tooth 80% and likewise for the replacement of a single missing anterior tooth 67% Variations in attitudes existed with respect to dentists factors years in practice pStudy 2 This study involved 30 dentists with postgraduate implant qualifications GDPP 33 dentists without postgraduate implant qualifications GDP and 27 dentists undergoing postgraduate training for implant qualifications GDPT Variations in treatment decision making were evident between the three groups pConclusions Study 1 In a community where provision of dental implants is widespread the attitudes of GDPs are not wholly in line with evidence based knowledge Variations in their attitudes exist with respect to dentist factors training and experience issues Study 2 Variations in treatment decision making with respect to retaining periodontally compromised teeth **Decision Making in Dental Treatment Planning** Walter B. Hall, 1998 This unique reference illustrates the thought processes of dentists in several of the clinical specialties when their specific aspect of care

is involved in complex dental cases The text is divided into five sections to present decision making for treatment planning as viewed by specialists in the areas of periodontics endodontics orthodontics prosthodontics and oral surgery Each chapter is presented in a format that enables the reader to find solutions more easily than in traditional texts Explanatory text accompanied by illustrations and references appears on the left hand page and an algorithm or decision tree appears on the right hand page NEW to this edition Coverage of recent changes in dental treatment options that affect your decision making process New information on surgery and implants in the periodontic section Revised and expanded material on endodontics orthodontics and prosthodontics Many new photographs and algorithms throughout

Decision-making in Dental

Treatment Planning Bich Hue Lang-Hua,2012 **Clinical Decision Making** Elizabeth J. Kay,Nigel M. Nuttall,1997-03-30

Decision-making in Dental Treatment Planning Bich Hue Lang-Hua,University of Hong Kong,2012 *Clinical Decision Making and Treatment Planning in Osseointegration* Michael Engelman,1996 This work investigates the clinical decision making process in dealing with osseointegration in dentistry *Dental Treatment Planning for the Adult Patient* Laurence I. Barsh,1981

Evidence-Based Decision Making in Dentistry Eyal Rosen,Carlos E. Nemcovsky,Igor Tsesis,2017-01-05 This clinically oriented book covers all aspects of the evidence based decision making process in multidisciplinary management of the natural dentition The book opens by clarifying the principles of evidence based decision making and explaining how these principles should be applied in daily practice Individual chapters then focus specifically and in detail on endodontic periodontal and prosthetic considerations identifying aspects that need to be integrated into decision making and treatment planning Evidence based decision making with regard to preservation of the natural tooth versus extraction and implant placement is then discussed and a concluding chapter examines likely future trends in dentistry and how they may affect clinical decision making The authors include leading endodontists periodontists and prosthodontists Given the

multidisciplinary and comprehensive nature of the book it will be relevant and interesting to the entire dental community

Journal of Dental Education, 1993 Critical Decisions in Periodontology Walter B. Hall, 2003 Critical Decisions in Periodontology Fourth Edition is designed to guide students and practitioners in applying their decision making knowledge in a structured and logical manner The decisions may be in diagnosis treatment selections and options procedures in various treatments and evaluating outcomes This new edition sees a section **Decision Making in Periodontology** Walter B. Hall, 1998 DECISION MAKING IN PERIODONTOLOGY illustrates the thought processes in the field of periodontics that determine optimal therapy for an individual patient The approach entails the use of a decision tree for each clinical problem or situation this is accompanied by a brief explanation of the basis for each decision The chapters present common clinical problems in a format that enables the reader to find solutions more easily than in traditional texts In addition several readily available references are included with each chapter The text is organized into eleven sections from the most basic to the most complex for assistance with problem solving in dental practices Sections include History Taking Indications for Collecting and Recording Data Signs and Symptoms Initial Therapy Evaluation and Detecting and Recording Findings Differential Diagnosis and Treatment Planning among others that focus on clinician's concerns Each chapter includes several readily available references organized into sections from most basic to most complex Decision tree format is provided for each clinical problem or situation Signs and symptoms section presents unique diagnostic approach options shown in the algorithms Includes decision trees that address periodontal treatment for impacted third molars and five different types of implants *Diagnosis and Treatment Planning in Dentistry* Stephen J. Stefanac, Samuel Paul Nesbit, 2016-02-05 Preceded by Treatment planning in dentistry edited by Stephen J Stefanac Samuel Paul Nesbit 2nd ed c2007 **Boucher's Prosthodontic Treatment for Edentulous Patients** George Albert Zarb, Charles L. Bolender, Gunnar E. Carlsson, Carl O. Boucher, 1997 This text has enjoyed a distinguished reputation for almost 50 years It has been completely revised for this 11th edition and includes chapters by several clinical educators of international stature The text synthesizes the diverse scientific clinical and bio mechanical knowledge required to manage the edentulous predicament It analyzes the sequelae of edentulism and provides a rationale for treatment with complete dentures This knowledge base is also fundamental for alternative treatment modalities such as implant supported prostheses Particular emphasis is given to the special aspects of the aging edentulous state **Practical Treatment Planning for the Paedodontic Patient** A. S. Blinkhorn, Iain C. Mackie, 1992 This work provides advice on the diagnosis of child dental patients the devising of appropriate treatment plans and the provision of care for and advice to children receiving dental treatment The book is intended to be useful to dentists in hospital service and in general practice **Prosthodontic Treatment for Edentulous Patients** George Albert Zarb, Charles L. Bolender, Steven E. Eckert, 2004 This text provides an excellent opportunity to learn about the treatment of patients with dentures a topic rarely covered in other books despite the fact that thousands of patients require them It offers

a thorough understanding of the functional and esthetic implications of edentulism as well as information on the behavioral and clinical aspects of diagnosis and treatment With topics ranging from treatment modalities to tooth supported prostheses to both immediate and complete dentures this valuable resource gives the basic information necessary to treat the edentulous patient This edition continues to focus on implant prosthodontics as more and more people choose to make this simple effective affordable option a part of their treatment This text addresses the different types of edentulous patients including thorough discussions of both short and long term patients Detailed coverage of the elderly and or edentulous patients provides the reader with the specialized knowledge needed to treat these groups Over 800 images accompanying procedures concepts and techniques enhance understanding and comprehension of each topic presented Material on achieving a satisfactory esthetic effect emphasizes the importance of satisfying the patient Topics on related and supplemental procedures feature information on overdentures immediate dentures and single complete dentures This title has been revised more than any other book on the subject in order to maintain its long standing value and recognition as an authoritative source on prosthodontics for the edentulous The condensed format provides relevant information that is conveniently sized and reasonably priced Clear and concise language makes even the most difficult subjects and procedures easy to follow The bibliography lists at the end of each chapter direct readers to additional literature on the topics The diverse and distinguished editorial contributor pool lends credibility and experience to each topic The content has been reorganized to make the material more concise and easier to read Brand new chapters on temporomandibular disorders materials prescribed and the current and future direction in implant prosthodontics keep the reader aware of developments in the field As reflected in the changed title this edition has been expanded and updated to emphasize the growing importance of implant supported prostheses The reorganization and consolidation of chapters into four major sections enhances readability Eight new contributors and 4 new editors offer a fresh perspective
