DECISION MAKING STYLE: Social and Creative

Dimensions DEV VERMA, 2009-12 As a leader or responsible person we often stuck with decision making It s our job to make decisions that are in the best interest of the whole organisation or to ourselves We must consider the good of many not of a few This is a big responsibility and very often people don t appreciate our efforts In fact many times people get angry at us because of the decisions we make to help them In this book we discuss decision making style Not the decision itself but style We hope that readers will appreciate this effort

Decision Making: Social and Creative Dimensions C.M. Allwood, M.

Selart, 2013-04-17 Decision making is a complex phenomenon which normally is deeply integrated into social life At the same time the decision making process often gives the decision maker an opportunity for conscious planning and for taking a reflective stance with respect to the action considered This suggests that decision making allows creative solutions with a potential to change the course of events both on an individual and a collective level Given these considerations we argue that in order to more fully understand decision making the perspectives of different disciplines are needed In this volume we have attempted to draw together contributions that would provide a broad view of decision making Much work has been carried out in the writing and editing of this volume First of all we would like to thank the contributors for their efforts in producing interesting and important texts and for their patience in the editorial process Each chapter was edited by two or three reviewers These reviewers are listed on a separate page in this book Our heartfelt thanks go to them for their time and for their incisive and constructive reviews We are also grateful to the publishing editors at Kluwer Academic Publishers Christiane Roll and Dorien Francissen who have been generous with their encouragement and patience throughout the editorial process

Creative Knowledge Environments Sven Hemlin, Carl Martin Allwood, Ben R. Martin, 2004 Although there is an ever increasing demand for new technology and innovations in the economy and society in general we currently know little about the conditions for stimulating creativity in relation to research and innovative activity This book fills a significant gap in the literature by examining the environmental factors that encourage creative working processes for research and innovation Uniquely the book investigates creative environments rather than creative individuals which has been the traditional focus of most previous research The authors first explain what a Creative Knowledge Environment CKE is and then examine the phenomenon in a number of case studies at the micro meso and macro levels By analysing the conditions and mechanisms conducive to creativity in both private and public institutions they are able to identify the work environments which appear to best stimulate the creation of knowledge They combine and integrate the previously rather disparate literature on creativity and innovation and summarise what we know about creativity on the basis of current research in a range of disciplines They also link their findings to contemporary debates about the knowledge society the knowledge economy and knowledge management and address relevant issues in science and technology policy relating to

knowledge production and exploitation The concluding chapter summarises what we now know about CKEs and how best to stimulate them including a discussion of the policy implications and an agenda for future research Academics and researchers in the fields of science and technology policy innovation management and business will welcome this original and insightful book It will also be a useful reference for policymakers involved in knowledge management and practitioners in R D departments universities and knowledge intensive business sectors *Ecological Consumer Decision Making* Kim
