## **Declining By Degrees Higher Education At Risk:**

**Declining by Degrees** Richard H. Hersh, John Merrow, 2015-04-07 What is actually happening on college campuses in the years between admission and graduation Not enough to keep America competitive and not enough to provide our citizens with fulfilling lives When A Nation at Risk called attention to the problems of our public schools in 1983 that landmark report provided a convenient cover for higher education inadvertently implying that all was well on America's campuses Declining by Degrees blows higher education's cover It asks tough and long overdue questions about our colleges and universities In candid coherent and ultimately provocative ways Declining by Degrees reveals how students are being short changed by lowered academic expectations and standards why many universities focus on research instead of teaching and spend more on recruiting and athletics than on salaries for professors why students are disillusioned how administrations are obsessed with rankings in news magazines rather than the quality of learning why the media ignore the often catastrophic results and how many professors and students have an unspoken non aggression pact when it comes to academic effort Declining by Degrees argues persuasively that the multi billion dollar enterprise of higher education has gone astray At the same time these essays offer specific prescriptions for change warning that our nation is in fact at greater risk if we do nothing

**Declining by Degrees** Richard H. Hersh, John Merrow, 2006-05-01 Two decades ago A Nation at Risk sounded a national alarm on K 12 education Now an equally urgent alarm is being sounded for higher education in America In Declining by Degrees leading authors and educators such as Tom Wolfe Jim Fallows and Jay Mathews provide us with a valuable understanding of the serious issues facing colleges today such as budget cuts grade inflation questionable recruitment strategies and a major focus on Big Time Sports Tied to the PBS documentary of the same name Declining by Degrees creates a national discussion about the future of higher education and what we can do about it Higher Education and the Market Roger Brown, 2010-09-13 The introduction of market forces into higher education is the most crucial issue facing universities and colleges today As the role of universities in the knowledge society becomes ever more apparent and as public funding reaches its limit marketisation has become an issue of critical importance Discussions about the ever increasing cost of tuition affordability access university rankings information and the commercialization of academic research take place not just in North America Western Europe and Australasia but also in Eastern Europe Asia and Latin America Higher Education and the Market provides a comprehensive account of this phenomenon and looks at its likely impact on key dimensions of university activity system structure funding and resources the curriculum participation and achievement research and scholarship interactions with third parties Contributors propose how market forces government intervention and academic self regulation can be combined to harness the benefits of increased competition and efficiency without losing the public good It is of particular interest to government and institutional leaders policy makers researchers and students studying higher education Education and Its Discontents Mark Moss, 2012 Education and Its Discontents Teaching the Humanities

and the Importance of a Liberal Education in the Age of Mass Information by Mark Moss is an exploration of how the traditional educational environment particularly in the post secondary world is changing as a consequence of the influx of new technology. Students come to the classroom or lecture hall expecting to have their habits and tastes gleaned from the online world replicated in an Educational environment. Faculty who do not adapt face enormous obstacles and faculty that do adapt run the risk of eroding the integrity of what they have been trained to teach. Students now have access to myriad of technologies that instead of supplementing the educational process have actually taken it over. Issues that run from plagiarism to the erosion of the humanities are now rampant concerns in the post secondary world. Behavior issues, YouTube videos, cell phones and the incessant clicking of the computer keys are just a few of the technologies altering the educational landscape. Moss discusses that it is now not only how we learn but what we continue to teach and how that enormously important legacy is protected.

*Education and Its Discontents: Teaching the Humanities and the Importance of a Liberal Education in the Age of Mass Information* by Mark Moss argues that education has changed and the supremacy of the book and the lecture is now open for debate. What has been gained over the last five hundred years is now susceptible to the vagaries of technology which compel us to question their continuing relevance. *The Art and Politics of Academic Governance* Kenneth P. Mortimer, Colleen O'Brien Sathre, 2010-02-15 Using case studies and relevant literature this book illustrates the challenges to legitimate shared governance domains when the routine of the academy is forced to deal with big issues often brought on by external forces. Mortimer and Sathre have gone beyond a discussion of faculty administrative behavior by focusing on what happens when the legitimate governance claims of faculty, trustees and presidents clash. They place these relationships in the broader context of internal institutional governance and analyze the dynamics that unfold when advocacy trumps collegiality. The book closes with a defense of shared governance and offers observations and practical suggestions about how the academy can share authority effectively and further achieve its mission. *Annual Report* Community College of Denver, 2004 *TV Guide*, 2005 **Faculty at the Margins** Nancy Van Note Chism, 2008-09-16 This volume looks at faculty who are different from the traditional conception of the professor in academia by virtue of the conditions of their appointments, their demographics or the tasks upon which they focus. In all cases their differences put them at the margins. Four chapters explore contingent contractual arrangements for faculty employment distinguishing them in four year, two year and virtual university contexts. Four chapters then examine the issues of historically underrepresented faculty: women and people of color who are becoming a larger proportion of the total faculty population but often at slower rates and in less advantageous categories than majority members. Then chapters in the final section look at faculty who choose or agree to focus on work that is not normally at the top of the institutional value scheme: student learning and development and community service. Positive initiatives already in progress can improve the situations and effectiveness of members of all of these groups. The contributors of this volume provide a valuable resource to foster further

progress in this area This is the 143rd volume of the Jossey Bass quarterly report series New Directions for Higher Education Addressed to presidents vice presidents deans and other higher education decision makers on all kinds of campuses New Directions for Higher Education provides timely information and authoritative advice about major issues and administrative problems confronting every institution **Speaking of Higher Education** Jason Johnson,2008 WPA, Writing Program Administration ,2007 **NACADA Journal** ,2006 **American Educational Research Association Annual Meeting Program** American Educational Research Association,2007 *The Rising Cost of College* Ronald D. Lankford, Jr.,2009 From the Publisher Greenhaven Press s At Issue series provides a wide range of opinions on individual social issues Each volume focuses on a specific issue and offers a variety of perspectives eyewitness accounts governmental views scientific analysis newspaper and magazine accounts and many more to illuminate the issue Extensive bibliographies and annotated lists of relevant organizations point to sources for further research Enhancing critical thinking skills each At Issue volume is an excellent research tool to help readers understand current social issues and prepare reports Therapeutic Jurisprudence at the Conference of the International Association of Law & Mental Health in Padua, Italy ,2008

**Composition(s) in the New Liberal Arts** Joanna Castner Post,James A. Inman,2009 This book brings a diverse group of scholars together to discuss how composition studies should evolve in the context of ongoing changes related to higher education These changes include new shifts in student demographics increasing demands for accountability in educational outcomes continuing expectations that a university education will lead to a good job questions about the utility of composition and more Such commonly cited changes have been occurring for quite some time creating the necessity for compositionists to continually re evaluate their approaches to writing instruction The editors believe that composition studies has entered an exciting period of change with opportunities to consider new places and purposes for writing instruction

Trusteeship ,2006 **Developing a Comprehensive Faculty Evaluation System** Raoul A. Arreola,2007 Based on thirty six years of research and experience building and operating large scale faculty evaluation systems and consulting to thousands of college and university personnel the author has established an eight step process for building a comprehensive evaluation system These steps include Determining the faculty role model Determining the faculty role model parameter values Determining roles in the faculty role model Determining role component weights Determining appropriate sources of information Determining the source impact weights Determining how information should be gathered and Completing the system by selecting or designing forms protocols and rating scales In this third edition each step including the definitions of the various roles to be evaluated has been expanded and enhanced based on the experiences of many institutions that have followed the procedure outlined in the book The third edition also features a new introduction fresh research in the field updated forms and procedures a new detailed case study of an institution that developed a Web enabled computer supported system based on the eight step process and a new body of work that defines the professoriate as a meta profession with a
