Afraid of Philosophy? Jacques Derrida, 2002 While addressing specific contemporary political issues on occasion thus providing insight into the pragmatic deployment of deconstructive analysis the essays deal mainly with much broader concerns With his typical rigor and spark Derrida investigates the genealogy of several central concepts which any debate about teaching and the university must confront Deconstruction and Pragmatism Simon Critchley, Jacques

Derrida, Ernesto Laclau, Richard Rorty, 1996 First Published in 1996 Routledge is an imprint of Taylor Francis an informa company **For Strasbourg** Jacques Derrida, 2014-04-01 For Strasbourg consists of a series of essays and interviews about

the city of Strasbourg and the philosophical friendships Jacques Derrida developed there over a period of some forty years Written just months before his death the opening essay The Place Name s Strasbourg recounts in detail and in very moving terms Derrida s deep attachment to this French city on the border between France and Germany More than just a personal narrative however the essay is a profound interrogation of the relationship between philosophy and place philosophy and language and philosophy and friendship As such it raises a series of philosophical political and ethical questions that might all be placed under the aegis of what Derrida once called philosophical nationalities and nationalism The other three texts included in the book are long interviews conversations between Derrida and his two principal interlocutors in Strasbourg Jean Luc Nancy and Philippe Lacoue Labarthe These interviews are significant both for the themes they focus on language politics friendship death life after death and so on and for what they reveal about Derrida s relationships to Nancy and Lacoue Labarthe Filled with sharp insights into one another's work and peppered with personal anecdotes and humor the interviews bear witness to the decades long intellectual friendships of these three important contemporary thinkers This collection thus stands as a reminder of and testimony to Derrida s unique relationship to Strasbourg and to the two thinkers most closely associated with that city *Deconstruction in a Nutshell* Jacques Derrida, 1997 Responding to questions put to him at a Roundtable held at Villanova University in 1994 Jacques Derrida leads the reader through an illuminating discussion

of the central themes of deconstruction Speaking in English and extemporaneously Derrida takes up with unusual clarity and great eloquence such topics as the task of philosophy the Greeks justice responsibility the gift the community the distinction between the messianic and the concrete messianisms and his interpretation of James Joyce Derrida convincingly refutes the charges of relativism and nihilism that are often leveled at deconstruction by its critics and sets forth the profoundly affirmative and ethico political thrust of his work The Roundtable is marked by the unusual clarity of Derrida s presentation and by the deep respect for the great works of the philosophical and literary tradition with which he characterizes his philosophical work The Roundtable is annotated by John D Caputo the David R Cook Professor of Philosophy at Villanova University who has supplied cross references to Derrida s writings where the reader may find further discussion on these topics Professor Caputo has also supplied a commentary which elaborates the principal issues raised in the Roundtable In all this volume represents one of the most lucid compact and reliable introductions to Derrida and deconstruction available in any language An ideal volume for students approaching Derrida for the first time Deconstruction in a Nutshell will prove instructive and illuminating as well for those already familiar with Derrida s work

Routledge Philosophy Guidebook to Derrida on Deconstruction Barry Stocker,2006-04-18 Examining one of the most important and prolific figures in modern thought Barry Stocker offers a lucid introduction to key texts including Speech and Phenomena Of Grammatology and Writing and Difference

Deconstruction in a Nutshell Jacques Derrida,2020-10-06 Responding to questions put to him at a Roundtable held at Villanova University in 1994 Jacques Derrida leads the reader through an illuminating discussion of the central themes of deconstruction Speaking in English and extemporaneously Derrida takes up with unusual clarity and great eloquence such topics as the task of philosophy the Greeks justice responsibility the gift the community the distinction between the messianic and the concrete messianisms and his interpretation of James Joyce Derrida convincingly refutes the charges of relativism and nihilism that are often leveled at deconstruction by its critics and sets forth the profoundly affirmative and ethico political thrust of his work The Roundtable is marked by the unusual clarity of Derrida s presentation and by the deep respect for the great works of the philosophical and literary tradition with which he characterizes his philosophical work The Roundtable is annotated by John D Caputo the David R Cook Professor of Philosophy at Villanova University who has supplied cross references to Derrida s writings where the reader may find further discussion on these topics Professor Caputo has also supplied a commentary which elaborates the principal issues raised in the Roundtable In all this volume represents one of the most lucid compact and reliable introductions to Derrida and deconstruction available in any language An ideal volume for students approaching Derrida for the first time Deconstruction in a Nutshell will prove instructive and illuminating as well for those already familiar with Derrida s work

Deconstruction as Analytic Philosophy Samuel C. Wheeler,2000 These twelve essays treat the thought of deconstructive philosophers from the perspective of analytic philosophy and relate the works of such thinkers as Davidson Quine and Wittgenstein to the writings

of Derrida and de Man *Hermeneutics and Deconstruction* Hugh J. Silverman, Don Ihde, 1985-01-01 Hermeneutics and Deconstruction provides an assessment of two dominant modes of thinking and writing in continental philosophy today It addresses central issues in the theory of interpretation and in the strategies of textual reading Placed in the context of contemporary philosophical practice this volume raises the question of the end of philosophy and offers different ways of understanding how the question of closure in philosophy can itself open up a whole range of philosophical activities Special attention is given to the practice of interpretation in the areas of science perception and literature and to the dimensions of hermeneutic understanding with respect to being life and the world An investigation of how history is interpreted and read as a text provides access to one of the significant differences between hermeneutic understanding and deconstructionist practice A section is devoted to the controversy concerning the value and the achievement of deconstruction The writings of Heidegger and Derrida are juxtaposed and examined And the volume concludes with several indications of new directions in continental philosophy and various versions of what a post Derridean reading might entail **Eyes of the University**

Jacques Derrida, 2004 Completing the translation of Derrida's monumental work *Right to Philosophy Eyes of the University* brings together many of the philosopher's most important texts on the university and more broadly on the languages and institutions of philosophy **Derrida and Deconstruction** Hugh J. Silverman, 2004-01-14 The effects of Derrida's writings have been widespread in literary circles where they have transformed current work in literary theory By contrast Derrida's philosophical writings which deal with the whole range of western thought from Plato to Foucault have not received adequate attention by philosophers Organized around Derrida's readings of major figures in the history of philosophy *Derrida and Deconstruction* focuses on and assesses his specifically philosophical contribution Contemporary continental philosophers assess Derrida's account of philosophical tradition with each contributor providing a critical study of Derrida's position on a philosopher she or he has already studied in depth These figures include Plato Meister Eckhart Descartes Kant Hegel Nietzsche Freud Husserl Heidegger Sartre and Foucault Of Grammatology Jacques Derrida, 2013-10-17 Jacques

Derrida's revolutionary theories about deconstruction phenomenology psychoanalysis and structuralism first voiced in the 1960s forever changed the face of European and American criticism The ideas in *De la grammatologie* sparked lively debates in intellectual circles that included students of literature philosophy and the humanities inspiring these students to ask questions of their disciplines that had previously been considered improper Thirty years later the immense influence of Derrida's work is still igniting controversy thanks in part to Gayatri Spivak's translation which captures the richness and complexity of the original This corrected edition adds a new index of the critics and philosophers cited in the text and makes one of contemporary criticism's most indispensable works even more accessible and usable **Thinking Out of Sight**

Jacques Derrida, 2024-05-31 Jacques Derrida remains a leading voice of philosophy his works still resonating today and for more than three decades one of the main sites of Derridean deconstruction has been the arts Collecting nineteen texts

spanning from 1979 to 2004 *Thinking out of Sight* brings to light Derrida's most inventive ideas about the making of visual artworks. The book is divided into three sections. The first demonstrates Derrida's preoccupation with visibility, image and space. The second contains interviews and collaborations with artists on topics ranging from the politics of color to the components of painting. Finally, the book delves into Derrida's writings on photography, video, cinema and theater, ending with a text published just before his death about his complex relationship to his own image. With many texts appearing for the first time in English, *Thinking out of Sight* helps us better understand the critique of representation and visibility throughout Derrida's work and most importantly to assess the significance of his insights about art and its commentary.

The Politics of Deconstruction Martin McQuillan, 2007-08-20 In this fine collection a group of distinguished scholars have produced the best book so far about Derrida's politics of the future. J. Hillis Miller, Distinguished Research Professor, University of California at Irvine. Jacques Derrida has had a huge influence on contemporary political theory and political philosophy. Derrida's thinking has inspired Slavoj Žižek, Richard Rorty, Ernesto Laclau, Judith Butler and many more contemporary theorists. This book brings together a first class line up of Derrida scholars to develop a deconstructive approach to politics. Deconstruction examines the internal logic of any given text or discourse. It helps us analyse the contradictions inherent in all schools of thought and as such it has proved revolutionary in political analysis, particularly ideology critique. This book is ideal for all students of political theory and anyone looking for an accessible guide to Derrida's thinking and how it can be used as a radical tool for political analysis.

Philosophy Beside Itself Stephen W. Melville, 1986-01-01 Deconstruction in Context Mark C. Taylor, 1986 Jacques Derrida's Cambridge Affair Niall Gildea, 2019-11-20 What is philosophy? A question often asked but usually in an abstract or speculative way. Rarely do we find a case of philosophy being determined in the real world. However, at Cambridge in 1992 this is exactly what happened as a debate took place over the merits or otherwise of awarding an Honorary Doctorate of Letters to the philosopher Jacques Derrida. Derrida's supporters argued that his deconstruction of Western traditions of thinking ushered in an important new manner of doing philosophy; his detractors dismissed his work as charlatanry, philistinism and non-philosophy. As arguments raged over the validity of introducing the canon of Continental philosophy to the Humanities in British Higher Education, the so-called Theory Wars, Derrida's Cambridge Affair focalized this decisive conflict more than anything else. This is the first study of the Cambridge Affair. Drawing upon archival and unpublished material, little known texts pertaining to the Affair and Derrida's own oeuvre, this original account offers an historical and philosophical reconstruction of this crucial debate, evaluating it against the body of work it put on trial.

Margins of Philosophy Jacques Derrida, 1982 In this densely imbricated volume Derrida pursues his devoted, relentless dismantling of the philosophical tradition, the tradition of Plato, Kant, Hegel, Nietzsche, Husserl, Heidegger, each dealt with in one or more of the essays. There are essays too on linguistics, Saussure, Benveniste, Austin and on the nature of metaphor. *White Mythology*, the latter with important implications for literary theory. Derrida is fully in control of a

dazzling stylistic register in this book a source of true illumination for those prepared to follow his arduous path Bass is a superb translator and annotator His notes on the multilingual allusions and puns are a great service Alexander Gelley Library Journal Taking on the Tradition Michael Naas,2003 In this volume the author focuses on how the work of Derrida has helped rework the themes of tradition legacy and inheritance in Western philosophy It includes readings of Derrida s texts that demonstrate the claims he makes cannot be understood without considering the way in which he makes those claims

The Textual Sublime Hugh J. Silverman,Gary E. Aylesworth,1990-01-05 This book addresses the question of deconstruction by asking what it is and discussing its alternatives To what extent does deconstruction derive from a philosophical stance and to what extent does it depend upon a set of strategies moves and rhetorical practices that result in criticism Special attention is given to the formulations offered by Jacques Derrida in relation to Heidegger s philosophy and by Paul de Man in relation to Kant s theory of the sublime and its implications for criticism And what in deconstructive terms does it mean to translate from one textual corpus into another Is it a matter of different theories of translation or of different practices And what of difference itself Does not difference already invoke the possibility of deconstruction s others Althusser Adorno and Deleuze are offered as exemplary cases The essays in this volume examine in detail these differences and alternatives The Textual Sublime is particularly concerned with how a text philosophical or literary sets its own limits borders and margins how it delimits what constitutes the text per se and how it invokes at the same time what is not determinately in the text The textual sublime is that aspect of a text that deconstruction shows to be both an element of the text and what surpasses the text what takes it outside itself in view of alternatives and alterities and what ties it to differing philosophical rhetorical historical and critical practices
