Culler, 2003 **A Reflexive Reading of Urban Space** Mona A. Abdelwahab, 2018-02-13 Providing a critique of the concepts attached to the representation of urban space this ground breaking book formulates a new theory of space which understands the dynamic interrelations between physical and social spaces while tracing the wider urban context It offers a new tool to approach the reading of these interrelations through reflexive reading strategies that identify singular reading fragments of the different spaces through multiple reader time space relations The strategies proposed in the volume seek to develop an integrative reading of urban space through recognition of the singular influenced by discourse institution etc and temporal influenced by reading perspective in space and time thereby providing a relational perspective that goes beyond the paradox of place in between social and physical space identifying each in terms of relationships oscillating between the conceptual the physical and social content and the context In conclusion the book suggests that space place can be read through sequential fragments of people place context mind and author reader Operating at different scales between conceptual space and reality the sequential reading helps the recognition of multiplicity and the dynamics of place as a transformational process without hierarchy or classification Communication, Cultural and Media Studies John Hartley, 2012-03-29 This fourth edition of Communication Cultural and Media Studies The Key Concepts is an indispensable guide to the most important terms in the field It offers clear explanations of the key concepts exploring their origins what they re used for and why they provoke discussion The author provides a multi disciplinary explanation and assessment of the
