Deconstruction II Architectural Design Profile 77:

Deconstruction II Academy Press, 1994-04-13 Features contributions from Peter Eisenman Bernard Tschumi Daniel Libeskind Andrew Benjamin Gunter Behnisch Hiromi Fuji and Morphosis In a seminal introductory text Jacques Derrida is in conversation with Christopher Norris discussing Deconstruction as a philosophical idiom and critical methodology and its role as the basis of the architectural and artistic aesthetic **Deconstruction II**, 1989 *Architecture* Jonathan Hill, 2014-04-04 The aim of this book is to expand the subject and matter of architecture and to explore their interdependence There are now many architectures This book acknowledges architecture far beyond the familiar boundaries of the discipline and reassesses the object at its centre the building Architectural matter is not always physical or building fabric It is whatever architecture is made of whether words bricks blood cells sounds or pixels The fifteen chapters are divided into three sections on buildings spaces and bodies which each deal with a particular understanding of architecture and architectural matter The richness and diversity of subjects and materials discussed in this book locates architecture firmly in the world as a whole not just the domain of architects In stating that architecture is far more than the work of architects this book aims not to deny the importance of architects in the production of architecture but to see their role in more balanced terms and to acknowledge other architectural producers Architecture can for example be found in the incisions of a surgeon the instructions of a choreographer or the movements of a user Architecture can be made of anything and by anyone
