Music and Technoculture René T. A. Lysloff, Leslie C. Gay, Jr., 2013-08-15 Moving from web to field from Victorian parlor to 21st century mall the 15 essays gathered here yield new insights regarding the intersection of local culture musical creativity and technological possibilities Inspired by the concept of technoculture the authors locate technology squarely in the middle of expressive culture they are concerned with how technology culturally informs and infuses aspects of everyday life and musical experience and they argue that this merger does not necessarily result in a cultural grayout but instead often produces exciting new possibilities In this collection we find evidence of musical practices and ways of knowing music that are informed or even significantly transformed by new technologies yet remain profoundly local in style and meaning
