MARKETING Dr. H. S. Nagalakshmi, 2025-10-17 It s with great happiness that I would like to acknowledge a great deal of people that get helped me extremely through the entire difficult challenging but a rewarding and interesting path towards some sort of Edited Book without having their help and support none of this work could have been possible *The New Digital Shoreline* Roger McHaney, 2023-07-03 Two seismic forces beyond our control the advent of Web 2 0 and the inexorable influx of tech savvy Millennials on campus are shaping what Roger McHaney calls The New Digital Shoreline of higher education Failure to chart its contours and adapt poses a major threat to higher education as we know it These forces demand that we as educators reconsider the learning theories pedagogies and practices on which we have depended and modify our interactions with students and peers all without sacrificing good teaching or lowering standards to improve student outcomes Achieving these goals requires understanding how the indigenous population of this new shoreline is different These students aren t necessarily smarter or technologically superior but they do have different expectations Their approaches to learning are shaped by social networking and other forms of convenient computer enabled and mobile communication devices by instant access to an over abundance of information by technologies that have conferred the ability to personalize and customize their world to a degree never seen before and by time shifting and time slicing As well as understanding students assumptions and expectations we have no option but to familiarize ourselves with the characteristics and applications of Web 2 0 essentially a new mind set about how to use Internet technologies around the concepts of social computing social media content sharing filtering and user experience Roger McHaney not only deftly analyzes how Web 2 0

is shaping the attitudes and motivations of today's students but guides us through the topography of existing and emerging digital media environments applications platforms and devices not least the impact of e readers and tablets on the future of the textbook and the potential they have for disrupting teacher student relationships and if appropriately used for engaging students in their learning This book argues for nothing less than a reinvention of higher education to meet these new realities Just adding technology to our teaching practices will not suffice McHaney calls for a complete rethinking of our practice of teaching to meet the needs of this emerging world and envisioning ourselves as connected co learners with our students

Complicit Reah Bravo, 2024-06-18 A brave book that imbues MeToo era discourse with a fresh voice Kate Bolick New York Times bestselling author this is a thoroughly researched and deeply personal examination of how women unintentionally condone workplace abuse and what we can do to change things for the better When Reah Bravo began working at the Charlie Rose show the open secret of Rose's conduct towards women didn't deter her from pursuing a position she thought could launch her career in broadcast journalism She considered herself more than capable of handling any unprofessional behavior that might come her way But she soon learned a devastating truth we don't always react to abusive situations as we imagine we will When we live in a society where many feminist ideals are mainstream and women hold positions of power how is it possible that sexual misconduct remains prevalent When many employers mandate trainings to prevent harassment of all kinds why is workplace abuse still so rampant Weaving her own experience with those of other women and insights from experts Bravo reveals the psychological and cultural forces that make us all enablers of a sexist and dangerous status quo At a critical time in the ongoing fight for gender and racial justice Bravo has written an empathic and concise book that will inspire the next generation of voices courageous enough to rage against the machine Rebecca Carroll author of *Surviving the White Gaze*

Innovation Sucks! Alan Watkins, Simon May, 2021-03-14 Businesses spend billions on innovation with very little to show for their investment or effort This book challenges some of the ingrained truths of innovation and suggests a different approach Innovation is not the creation of a novel idea It is the successful commercialisation of that novel idea Rather than starting with a costly time consuming problem assessment that seeks to push potential solutions through an innovation funnel an impeller approach starts with possible solutions and gets the market to pull the best ones forward so they can fail fast or flourish fast This approach is made possible by the addition of a bee a new type of integrative thinker who can harvest the existing knowledge from the meadow of experts Completely reversing the innovation process means organisations are much better placed to win in the market rather than focusing on finding theoretical solutions or clearing innovation stage gates In addition this approach also recognises that the people who shepherd the solution through the ideation and testing stage are not the same people who must then take that solution to market for successful commercialisation Given the current innovation failure rate coupled with the fact that society is beset with multiple wicked problems it s time to think differently and innovate innovation itself This book is essential reading for Heads of Innovation and Commercialisation Directors of Marketing Heads of New Product Development and New Service Development Strategy Directors Chief Technology Officers Government advisers and policy makers
