Narrative Thematics Daniel Candel,2023-12-22 Cognitive Narratives Thematics proposes a new way in which narrative works organise their thematic material It rehabilitates the study of what books are about by providing a cognitive narrative thematic model CNT Part I presents CNT by combining different approaches to narrative such as evolutionary theory semiotics possible worlds theory or rhetorical criticism Part II applies CNT to a variety of well known narratives in different modalities such as Robert Browning's My Last Duchess Julia Donaldson's The Gruffalo Maurice Sendak's Where the Wild Things Are Frank Miller's 300 or Mike Mignola's Hellboy It also considers literary histories and digital humanities Daniel Candel shows that CNT deserves greater attention and that thematics generates its own forms and adds to the aesthetic

pleasure of the text Candel illustrates that CNT improves the established interpretations of the narrative works it studies This innovative study reveals how CNT offers readers a deeper understanding and how readers and critics are often using CNT intuitively without being aware of it It is an invaluable resource for students and scholars of narrative theory

Rendering Kyle May, Julia van den Hout, 2012-01-01 As information is distributed and consumed at an increasingly rapid pace one of the most effective or at least pervasive ways to communicate architectural ideas is through renderings Typically a perspectival image that can be understood without any knowledge of architectural drawing conventions the rendering derives power from its accessibility to a wide audience hence its crucial role in design competitions client presentations press releases and other such public forums While these architectural visualizations are certainly nothing new advances in software and hardware have enabled renderings to be made faster and more realistic than ever before This presents both an opportunity and a challenge On the one hand design concepts can now be tested and conveyed with an unprecedented degree of visual accuracy Conversely whether through omission extreme dramatization or even intentional fakery architects now have the ability to realistically depict the impossible Furthermore both clients and public are beginning to expect photorealistic imagery even at the earliest stages of a project when supposed realism can oftentimes belie the fundamentally speculative nature of design Given the importance of these images in mediating between architects and the people they ultimately serve CLOG will critically assess the state of renderings today
