A Beginner's Guide to Introduce Artificial Intelligence in Teaching and Learning Muralidhar Kurni, Mujeeb Shaik Mohammed, Srinivasa K G, 2023-06-28 This book reimagines education in today's Artificial Intelligence AI world and the Fourth Industrial Revolution. Artificial intelligence will drastically affect every industry and sector, and education is no exception. This book aims at how AI may impact the teaching and learning process in education. This book is designed to demystify AI for teachers and learners. This book will help improve education and support institutions in the phenomena of the emergence of AI in teaching and learning. This book presents a comprehensive study of how AI improves teaching and learning from AI-based learning platforms to AI-assisted proctored examinations. This book provides educators, learners, and administrators on how AI makes sense in their everyday practice. Describing the application of AI in ten key aspects, this comprehensive volume prepares educational leaders, designers, researchers, and policymakers to effectively rethink the teaching and learning process and environments that students need to thrive. The readers of this book never fall behind the fast pace and promising innovations of today's most advanced learning technology. **Minds, Machines, and Misinformation** Don Donghee Shin, 2025-08-11 Algorithms have become the key organizer through which power is enacted in our society. A huge amount of data regarding our daily routines are monitored and analyzed to make recommendations that manage control and lead our behaviors in everyday life. AI Humans and Misinformation: How Does AI Alter Human Behavior and How Do Humans Influence Algorithmic Misinformation is a guide to understanding the dynamics of AI and misinformation in human contexts by addressing meaningful questions: How does AI alter human behavior and how do humans influence algorithmic decision making? In answering these questions, this book examines the role of misinformation, disinformation, and fake news and shows readers how to develop AI methods and algorithms that combat misinformation by using AI design choices that provide users and developers alike with meaningful control over AI. This book brings together various perspectives on algorithms into an integrated conceptual framework and provides a broad socio-technical analysis addressing critical and ethical issues of misinformation and fake news. The book offers a compelling insight into the misinformation phenomenon and the future of AI-based society. Readers will find an integrated technical analysis of the logic and social implications of algorithmic processes. Reporting from the cutting edge of critical technical methods and research, the result is useful and constructive for developing the relations between algorithms and humans. This is an imperative methodology for understanding what is at stake as industry and government use AI to reshape the world. Provides a comprehensive examination of the technical foundations and social effects of algorithmic processes and how they are used to purvey and combat misinformation. Includes deep technical models for AI and ML algorithm developers who seek to alleviate the impacts of misinformation, including credibility assessment models, trust heuristics, and Information Processing Theory. Provides detailed technical understanding of computational approaches to combat misinformation, such as automated
