Hargittai,2022-12-20 What life during lockdown reveals about digital inequality The vast majority of people in wealthy highly connected or digitally privileged societies may have crossed the digital divide but being online does not mean that everyone is equally connected and digital inequality reflects experience both online and off In Connected in Isolation Eszter Hargittai looks at how this digital disparity played out during the unprecedented isolation imposed in the early days of the coronavirus pandemic During initial COVID 19 lockdowns the Internet for many became a lifeline as everything from family get togethers to doctor s visits moved online Using survey data collected in April and May of 2020 in the United States Italy and Switzerland Hargittai explores how people from varied backgrounds and differing skill levels were able to take advantage of digital media to find the crucial information they needed to help loved ones procure necessities understand rules and risks Her study reveals the extent to which long standing social and digital inequalities played a critical role in this move toward computer mediated communication and were often exacerbated in the process However Hargittai notes context matters her findings reveal that some populations traditionally disadvantaged with technology such as older people actually did better than others in part because of the continuing importance of traditional media television in particular The pandemic has permanently shifted how reliant we are upon online information and the implications of Hargittai s groundbreaking comparative research go far beyond the pandemic Connected in Isolation informs and expands our understanding of digital media including how they might mitigate or worsen existing social disparities whom they empower or disenfranchise and how we can identify and expand the skills people bring to them **Teaching Twelfth Night and Othello** Peggy

**How Do Teachers Communicate?** Joseph L. McCaleb,1987 The primary task of the monograph is to describe and evaluate the conceptualizations of communication found in assessment practices The first chapter contains a review and analysis of standardized measures and performance assessments of teachers communication Twelve communication categories emerge from an inspection of the performance assessments The numerous meanings given to communication are elaborated by an examination of differences within each category The second chapter focuses on theory and research The literature on instructional communication is examined and a model is developed with five critical skill areas It is shown how these areas are used for five functions or purposes and in different modes or patterns of communicating The final three chapters discuss limitations in current measures of communication The perspective of the communication theorist and linguist is used to identify important dimensions of communication that have received little if any

attention in the assessments The claim that most performance assessments are grounded in research on teaching effectiveness is explored and relationships between the assessments and the research are cited Limitations of that research paradigm are identified and implications for communication from an information processing model are discussed JD     **The National Sunday School Teacher** ,1876
