Artificial Intelligence Applications and Innovations Ilias Maglogiannis, Lazaros Iliadis, Elias Pimenidis, 2020-05-29
This 2 volume set of IFIP AICT 583 and 584 constitutes the refereed proceedings of the 16th IFIP WG 12.5 International Conference on Artificial Intelligence Applications and Innovations AIAI 2020 held in Neos Marmaras Greece in June 2020. The 70 full papers and 5 short papers presented were carefully reviewed and selected from 149 submissions. They cover a broad range of topics related to technical, legal and ethical aspects of artificial intelligence systems and their applications and are organized in the following sections: Part I: classification, clustering, unsupervised learning, analytics, image processing, learning algorithms, neural network modeling, object tracking, object detection systems, ontologies, AI and sentiment analysis, recommender systems. Part II: AI ethics, law, AI constraints, deep learning, LSTM, fuzzy algebra, fuzzy systems, machine learning, medical health systems and natural language. The conference was held virtually due to the COVID-19 pandemic. [A Web of Our Own Making](#) Antón Barba-Kay, 2023-05-11. There no longer seems any point to criticizing the internet. We indulge in the latest doom mongering about the evils of social media on social media. We scroll through routine complaints about the deterioration of our attention spans. We resign ourselves to hating the internet even as we spend much of our waking lives with it. Yet our unthinking surrender to its effects, to the ways it recasts our aims and desires, is itself digital technology's most powerful achievement. [A Web of Our Own Making](#) examines how online practices are reshaping our lives outside our notice. Barba Kay argues that digital technology is a natural technology, a technology so intuitive as to conceal the extent to which it transforms our attention. He shows how and why this technology is reconfiguring knowledge, culture, politics, aesthetics and theology. The digital revolution is primarily taking place not in Silicon Valley but within each of us. [How to Release Music](#) Kat Reinhert, Co-Founder F-Flat Books, Co-Founder Songwriting for Music Educators, Adjunct Professor of Music, Sarah Gulish, Sarah Gulish, 2025. Written by two independent artists and educators, [How to Release Music](#) gives artists, mentors and music educators working at the secondary or collegiate level a practical overview of what goes into releasing independent music, both original music and covers. Designed as an easy to read reference guide and resource for those teaching students who are curious about how the music industry works, the book offers fundamental knowledge for those who not only want to release their own music but whose students are interested in releasing music. [PC AI](#), 2000. [Artificial Intelligence for Beginners](#) Raef Meeuwisse, 2023-05-22. This book is designed as an easy insight into the fundamentals of artificial intelligence. You may be a student, business executive or just an everyday person looking to understand this important subject area. Artificial intelligence (AI) is the most exciting, significant, planet-changing development in human history. It is the natural progression of the digital revolution, designed as a thought engine that can exceed human brain limitations; it now shapes and controls many aspects of our daily lives. What were the origins of AI? How did the technology evolve? What are artificial neural networks and tensors and why are they important to the step change in AI? What are the regulatory and existential challenges?
