

The background of the cover is a composite of four historical scenes from Alberta. The top portion shows a modern city skyline, likely Calgary, with its characteristic skyscrapers. Below this, the image is divided into two main horizontal sections. The left section depicts a steam locomotive pulling a long freight train through a landscape, with a large herd of bison in the foreground. The right section shows an oil derrick in a field, with a large plume of white smoke or steam rising from its base. The title 'A BUSINESS HISTORY of ALBERTA' is superimposed over the top half of the image.

Business History Of Alberta:

A Business History of Alberta Henry Cornelius Klassen, 1999 Klassen looks at the role businesses have played in the economic political and social development of the province since the earliest European traders Relying heavily on analysis and case studies he considers the birth of business firms and the subsequent effects they have had on broader political and cultural matters Canadian card order number C99 910550 7 Annotation copyrighted by Book News Inc Portland OR A History of Corporate Governance around the World Randall K. Morck, 2007-11-01 For many Americans capitalism is a dynamic engine of prosperity that rewards the bold the daring and the hardworking But to many outside the United States capitalism seems like an initiative that serves only to concentrate power and wealth in the hands of a few hereditary oligarchies As *A History of Corporate Governance around the World* shows neither conception is wrong In this volume some of the brightest minds in the field of economics present new empirical research that suggests that each side of the debate has something to offer the other Free enterprise and well developed financial systems are proven to produce growth in those countries that have them But research also suggests that in some other capitalist countries arrangements truly do concentrate corporate ownership in the hands of a few wealthy families *A History of Corporate Governance around the World* provides historical studies of the patterns of corporate governance in several countries including the large industrial economies of Canada France Germany Italy Japan the United Kingdom and the United States larger developing economies like China and India and alternative models like those of the Netherlands and Sweden *International Bibliography of Business History* Francis Goodall, Terry Gourvish, Steven Tolliday, 2013-12-16 The field of business history has changed and grown dramatically over the last few years There is less interest in the traditional company centred approach and more concern about the wider business context With the growth of multi national corporations in the 1980s international and inter firm comparisons have gained in importance In addition there has been a move towards improving links with mainstream economic financial and social history through techniques and outlook *The International Bibliography of Business History* brings all of the strands together and provides the user with a comprehensive guide to the literature in the field The Bibliography is a unique volume which covers the depth and breadth of research in business history This exhaustive volume has been compiled by a team of subject specialists from around the world under the editorship of three prestigious business historians Business History and International Business Peter Buckley, 2014-01-02 Business History and International Business are cognate subjects There are few if any studies of international business that do not require a proper study of context International business decision making must be made relevant by a considered evaluation of the circumstances surrounding that decision This often means putting it into its historical context The contributions that the study of international business can make to business history are the input of appropriate theory and appropriate research methods The best international business theory can illuminate the seemingly disparate strategies of firms in given historical

circumstances and can provide an integrated overarching conceptual structure of the study of business history The research methods used in international business are also worthy of scrutiny by business historians The proposition of this book is that international business theory and method can complement business history This cross fertilization has been occurring with increasing regularity over the past few decades and this book brings together some of the fruits of this conjunction of two important intellectual domains This book was published as a special issue of Business History

Developing Alberta's Oil Sands Paul Anthony Chastko, 2004 Alberta's oil sands represent a vast and untapped oil reserve that could reasonably supply all of Canada's energy needs for the next 475 years With an estimated 300 billion barrels of recoverable oil at stake the quest to develop this natural resource has been undertaken by many powerful actors both nationally and internationally Using research that integrates the economic political scientific and business factors that have been influential in discovering and developing the sands this book provides a comprehensive history of the oil sands project and a window on the nature of the complex relationships between industry government and transnational players This book is the first comprehensive volume that examines the origins and development of the oil sands industry over the last century

Mermaids in History: Engendering Maritime Labour and Business History, 1700-1900, 2025-12-18 This volume aims to defamiliarise the economic and social maritime history of Europe and North America by revealing women's roles and multifaceted contributions in the male dominated maritime economic arena during industrial capitalist modernity By questioning the separated spheres paradigm the chapters in this volume highlight the intricate and illogical relation between women as economic actors and maritime capitalism and modernity Far from being a clear cut and linear trajectory this relationship is rather outlined as a layered dialectical relationship that simultaneously considers the interaction of forms of oppression and liberation Contributors are Paola Avallone Helen Berry Justine Cousin Ariana Domínguez García John Odin Jensen Kathy S Mason Erica Mezzoli Antonia Morey Luisa Maria Muñoz Abeledo Tomas Nilson Oskar Opassi Raffaella Salvemini Daniel J Alberó Santacreu Andreu Segú and Jo Stanley
